Putting Theory into Practice in the Contemporary Classroom Becky McLaughlin, 2017-01-06 This collection of fourteen essays by scholars from Canada Europe the United Kingdom and the United States emerges from a growing interest in the ways postmodern theory can illuminate not just the products and ideas of high culture but also the ins and outs of everyday life Taking the university classroom broadly construed as a site of theoretical investigation this volume helps us to understand troublesome classroom dynamics as well as offering pedagogical strategies for dealing with them It also illuminates current pressures on higher education that find expression in the classroom As a forum for these issues these essays draw upon Deleuzian feminist Foucauldian and psychoanalytic approaches among others recognizing not only that these approaches are often in conflict but also that collectively they enhance our understanding of the classroom Important questions posed here include whether and if so how we can combine a Marxist or Foucauldian emphasis on the disciplinary and hegemonic practices of educational institutions with a Lacanian or Barthesian appreciation for the disruptive pleasures and drives that the unconscious produces within and through students teachers and classrooms Which theoretical and pedagogical innovations can help teachers and students to get the job done as well as to theorize the job to simultaneously practice education and imagine other forms and ends for education How can theory help us to historicize criticize and re draw the productive but sometimes disabling lines that make the classroom and its subjects A site for lively theoretical debate about these and related pedagogical issues this volume will prove useful for anyone wanting to reinterpret reinvent and reinvigorate the classroom U.S. News & World Report ,2008

Congress. Senate,1967 **Issues In Education** Geraldine Coleman,2000-11-30 Very few issues are as important as education today and Dr Coleman weaves extant research with personal experiences to provide a contextual framework from which the reader can garner a more intense understanding of the issues She covers such issues as parental involvement academic achievement teacher attitude discipline student motivation and the impact of social problems on the education process and student achievement The discourse evolves around five underlying themes education is a partnership perceptions and attitudes dictate our behavior knowledge creates understanding and understanding creates change there are different ways of knowing and educators must expand their pedagogy to acknowledge and respond to the varied learning styles of students Because of the many social problems that impact the lives of students there is a need to redefine what it means to be a teacher and educate the whole child The author presents the issues from different perspectives emphasizing the need for home school and community to work together to advance the educational agenda for all children Dr Coleman offers an action plan for change and sends a clear message that by combining efforts schools homes and communities can affect change **Congressional Record** United States. Shute,2018-02-02 Adolescent girls wellbeing is under threat They face pressure to achieve academically while simultaneously negotiating a life dominated by social media an unrelenting focus on appearance cyberbullying sexual harassment and ready access to

pornography characterised by male violence to women The sociocultural environment presents significant risks for girls mental health yet clinical psychology remains largely focused on the individual Cultural factors are also overshadowed by postfeminist forces and a renewed emphasis on biological determinants of psychological sex differences Clinical Psychology and Adolescent Girls in a Postfeminist Era goes back to first principles and revisits the question of the place of nature and nurture in children s development in the light of what we now know about neural plasticity dynamic systems and gender socialisation Feminism and its sometimes uncomfortable relationship with psychology is discussed as are the meaning and implications of postfeminism and whether girls have special strengths Practice principles and specific ideas for practice with today s girls are all included Finally there is a complementary chapter on working with adolescent boys Feminist writings about psychotherapy with women had their heyday some time ago and some see boys as the ones who now need special attention This book contends that the changing pressures of today s western world call for a renewed interest in specialised practice with girls taking account of up to date theories about child development and exploring the idea of expanding clinical practice beyond the individual
