The SAGE Encyclopedia of

Higher Education Miriam E. David, Marilyn J. Amey, 2020-05-21 Higher Education is in a state of ferment People are seriously discussing whether the medieval ideal of the university as being excellent in all areas makes sense today given the number of universities that we have in the world Student fees are changing the orientation of students to the system The high rate of non repayment of fees in the UK is provoking difficult questions about whether the current system of funding makes sense There are disputes about the ratio of research to teaching and further discussions about the international delivery of courses

Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Why Public Higher Education Should Be Free Robert Samuels, 2013-08-15 Universities tend to be judged by the test scores of their incoming students and not on what students actually learn once they attend these institutions. While shared tests and surveys have been developed, most schools refuse to publish the results. Instead, they allow such publications as *U.S. News & World Report* to define educational quality. In order to raise their status in these rankings, institutions pour money into new facilities and extracurricular activities while underfunding their educational programs. In *Why Public Higher Education Should Be Free*, Robert Samuels argues that many institutions of higher education squander funds and mislead the public about such things as average class size, faculty to student ratios, number of faculty with PhDs, and other indicators of educational quality. Parents and students seem to have little knowledge of how colleges and universities have been restructured over the past thirty years. Samuels shows how research universities have begun to function as giant investment banks or hedge funds that spend money on athletics and administration while increasing tuition costs and actually lowering the quality of undergraduate education. In order to fight higher costs and lower quality, Samuels suggests universities must reallocate these misused funds and concentrate on their core mission of instruction and related research. Throughout the book, Samuels argues that the future of our economy and democracy rests on our ability to train students to be thoughtful participants in the production and analysis of knowledge. If leading universities serve only to grant credentials and prestige, our society will suffer irrevocable harm. Presenting the problem of how universities make and spend money, Samuels provides solutions to make these important institutions less expensive and more vital. By using current resources in a more effective manner, we could even, he contends, make all public higher education free.

New Era - New Urgency F. Joseph Merlino, Deborah Pomeroy, 2024-03-29 *New Era New Urgency: The Case for Repurposing Education* explores the unprecedented realities and challenges associated with entering a new era such as catastrophic climate changes, advanced artificial intelligence, massive demographic shifts, and worldwide digital disinformation campaigns. This era calls for a new urgency in thinking about how we will educate present and future generations of young people. This book is divided into four parts. Part I describes the profound social, technological, and demographic changes that have occurred over four hundred years since the first English settlements in Massachusetts and Virginia. Part II describes four shadows that have served to corrupt these purposes of education: extreme wealth inequality, nativism, white supremacy, and anti-intellectualism. Part III explores the illusions of educational reform that have overpromised college and career success, created an idolatry of math test scores, conflated memorization of facts with conceptual understanding, and confused multiple layers of policy agendas with progress. Part IV depicts F. Joseph Merlino and Deborah Pomeroy's twelve years of experience in Egypt, Bosnia, Herzegovina, Turkey, and the U.S. in helping to craft new purposes of education for model schools in their countries that reflect their aspirations for a new generation.

Understanding Teacher

Education in Contentious Times Catherine Cornbleth, 2013-10-30 Understanding Teacher Education in Contentious Times examines how public professional and private or corporate agencies operate to shape teacher education and possibilities for its improvement Teacher education programs particularly those leading to state certification or licensure are influenced not only by state regulations but also by required review and accreditation by an outside agency such as the National Council for the Accreditation of Teacher Education and are subject to various contextual pressures such as the cultures of the institutions that host them and their surrounding communities their potential student and employer markets strong individuals professional organizations history or tradition and increasingly external usually privately funded special interest corporations such as the National Council on Teacher Quality Unique among books on teacher education this volume interweaves in historical context including emerging trends the complex contexts in which practice and reform efforts take place and are supported or impeded

Whiteness in the Ivory Tower Nolan L. Cabrera, 2024 Whiteness is the foundation of racism and racial violence within higher education institutions It is deeply embedded in the ideologies and organizational structures of colleges and universities that guide practices policies and research The purpose of this book is not to simply uncover these practices but rather to intentionally center the harm that Whiteness causes to communities of Color broadly in order to transform these practices For example Cabrera explores what academic freedom and tenure could look like if they actually divorced themselves from Whiteness Readers will dive into these and other pressing issues guided by both critical social analysis as well as hope for the possibilities of human liberation from oppression This is important reading for university and college professors scholars diversity officers student affairs professionals and everyone looking for ways to center the needs of historically marginalized students Book Features Extends the work of Beverly Daniel Tatum classic text *Why Are All the Black Kids Sitting Together in the Cafeteria* Explores what truly embedding anti racism and decolonial praxis into higher education institutions could look like Uses critical race theory to analyze the cause of racism and the effect Whiteness has on people of Color Offers a critical but concurrently hopeful view that anti racist futures are both possible and necessary

The College Conversation Eric J. Furda, Jacques Steinberg, 2021-09-21 From an Ivy League dean and a college admissions expert a guide to help parents support their children as they navigate their way to college The College Conversation is a comprehensive resource for mapping the path through the college application process that provides practical advice and reassurance to keep both anxious parents and confused children sane and grounded Rather than adding to the existing canon of *How to Get In* college guides or rankings Eric Furda and Jacques Steinberg provide a step by step approach to having the tough conversations on this topic with less stress and more success The book is organized around key discussions and themes that trace the chronological arc of admissions and financial aid beginning before the assembly of a list of potential colleges and continuing through the receipt of decisions with a final section that includes advice on the first year of college The topics include preliminary conversations about the search and specifically how parents can think about

their children's interests and what kind of college would best suit them choosing a college based on its curriculum culture and community writing the most effective essays assessing acceptances including considerations of finances and aid and making the transition from high school to college life The College Conversation will provide parents students and counselors with the credible level headed information often missing in this process as well as a much needed dash of perspective borne of experience

Crafting a Class Elizabeth A. Duffy, Idana Goldberg, 2014-07-14 Admissions and financial aid policies at liberal arts colleges have changed dramatically since 1955 Through the 1950s most colleges in the United States enrolled fewer than 1000 students nearly all of whom were white Few colleges were truly selective in their admissions they accepted most students who applied In the 1960s as the children of the baby boom reached college age and both federal and institutional financial aid programs expanded many more students began to apply to college For the first time liberal arts colleges were faced with an abundance of applicants which raised new questions What criteria would they use to select students How would they award financial aid The answers to these questions were shaped by financial and educational considerations as well as by the struggles for civil rights and gender equality that swept across the nation The colleges answers also proved crucial to their futures as the years since the mid 1970s have shown When the influx of baby boom students slowed colleges began to recruit aggressively in order to maintain their class sizes In the past decade financial aid has become another tool that colleges use to compete for the best students By tracing the development of competitive admission and financial aid policies at a selected group of liberal arts colleges *Crafting a Class* explores how institutional decisions reflect and respond to broad demographic economic political and social forces Elizabeth Duffy and Idana Goldberg closely studied sixteen liberal arts colleges in Massachusetts and Ohio At each college they not only collected empirical data on admissions enrollment and financial aid trends but they also examined archival materials and interviewed current and former administrators Duffy and Goldberg have produced an authoritative and highly readable account of some of the most important changes that have taken place in American higher education during the tumultuous decades since the mid 1950s *Crafting a Class* will interest all readers who are concerned with the past and future directions of higher education in the United States Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Abercrombie Age Myles Ethan Lascity, 2024-10-01 Be popular and good looking it's the key to a happy life Luckily with a bit of know how and money you too can have it all At least that's what teen pop culture was selling in surround sound at the turn of the millennium From movies like *Clueless* to TV's *Dawson's Creek* to the music videos on MTV's *Total Request Live* and the catalogs of Abercrombie Fitch

a consumer minded ethos drove pop culture storytelling as millennials came of age in the late 1990s and early 2000s But in the long shadow of the Great Recession the upwardly mobile aspirations fostered by the era s popular culture and media seem to have been thwarted Many millennials today lack the wealth their parents had at the same age and the gaps between rich and poor rival those of the Gilded Age The Abercrombie Age reconsiders teen popular culture from the turn of the twenty first century revealing how it told young people that life not only could but surely would get better Far from frivolous or forgettable the era s superficial materialistic culture sold millennials unrealistic expectations of what life could offer setting up a stark juxtaposition with the realities of today

Doing College Right Joe O'Shea,2020 How do you know which college is right for you And what should you do during college to make the most of your time there In **Doing College Right** dean of undergraduate studies Joe O Shea helps readers to both choose a college and make key decisions throughout their higher education journey O Shea harnesses the latest research on how students develop and showcases award winning programs from across the United States that are making a difference in the lives of students **Doing College Right** is filled with helpful case examples practical rubrics and guiding questions to help readers evaluate colleges based on key dimensions of student success both before and during college This guide is important reading for prospective students and their families as well as college admissions staff and high school counselors In our national obsession with getting into a particular college Joe O Shea s book presents a new and welcome approach to the process A terrific new resource that I highly recommend Robert S Clagett coordinator of the Gap Year Research Consortium at Colorado College A reader friendly treasure trove of research based insights about what matters to a high quality undergraduate experience and the information needed to determine a promising fit George D Kuh chancellor s professor emeritus of higher education Indiana University

The Modern Land-grant University Robert J. Sternberg,2014 Contributors from across the university focus on what the land grant mission means to them in their daily endeavors whether that be crafting the undergraduate academic experience stimulating research or engaging with the community through extension activities The twenty contributions are divided into four parts exploring in turn the core mission of the modern land grant university the university environment the university s public value and its accountability The volume ends with an epilogue by the editor which summarizes the values underlying the activities of land grant institutions In a time of uncertainty in higher education this volume provides a helpful overview of the many different types of value public universities bring to American society

Assessing Organizational Performance in Higher Education Barbara A. Miller,2016-05-10 The book provides a full complement of assessment technologies that enable leaders to measure and evaluate performance using qualitative and quantitative performance indicators and reference points in each of seven areas of organizational performance While these technologies are not new applying them in a comprehensive assessment of the performance of both academic and administrative organization in higher education is a true innovation **Assessing Organizational Performance in Higher Education** defines four types of assessment user groups

each of which has unique interest in organizational performance This offers a new perspective on who uses performance results and why they use them These varied groups emphasize that assessment results must be tailored to fit the needs of specific groups that one size fits all does not apply in assessment An assessment process must be robust and capable of delivering the right information at the right time to the right user group
