Ehrenberg,1999 **Best Colleges 2021** U. S. News and World Report,2020-10-27 U S News expert advice on choosing getting into and paying for college and a directory of nearly 1 600 schools The Impact of "U.S. News & World Report" College Rankings on Admissions Outcomes and Pricing Policies at Selective Private Institutiions James Monks,Ronald G. Ehrenberg,1999 The Abundant University Michael D. Smith,2023-09-19 Why our current system of higher education is financially and morally unsustainable and how to address the crisis with the creative implementation of digital technologies For too long our system of higher education has been defined by scarcity scarcity in enrollment scarcity in instruction and scarcity in credentials In addition to failing students professionally this system has exacerbated social injustice and

socioeconomic stratification across the globe In *The Abundant University* Michael D Smith argues that the only way to create a financially and morally sustainable higher education system is by embracing digital technologies for enrolling instructing and credentialing students the same technologies that we have seen create abundance in access to resources in industry after industry The Abundant University explains how we got our current system why it is such an expensive inefficient mess and how a system based on exclusivity cannot foster inclusivity Smith challenges the resistance to digital technologies that we have already seen among numerous institutions citing the examples of faculty resistance toward digital learning platforms While acknowledging the understandable self preservation instinct of our current system of residential education Smith makes a case for how technology can engender greater educational opportunity and create changes that will benefit students employers and society as a whole

Universities, Rankings and the Dynamics of Global Higher Education Hans Peter Hertig, 2016-06-30 Global university rankings are now more than a decade old and this book uses the data they have produced to examine how the international landscape of universities has changed over the years It offers new insights into the power and limits of league tables a key element of globalized higher education that can be deplored but hardly ignored Case studies from Asia Europe and North America are explored to highlight the issues raised by a quantitative exercise that decontextualizes what is linked so strongly to local factors

Graduate Debt Free David F. Shutler, 2023-08-14 Escape the matrix of student loan debt In his new book Dave Shutler analyzes twelve faulty assumptions about obtaining a higher education and shows how they can lead to debilitating college debt Analogizing to the two realities in the Matrix movies he reveals underlying facts about the assumptions to high schoolers and their parents These assumptions range from deciding whether to attend college in the first place to the importance of selecting a major to how to minimize college living costs This book is a systematic guide to the many misconceptions that students hold in the college application process Shutler analyzes each misconception showing how it can lead to debt and then provides strategies to escape that debt Dave Shutler sheds light on scholarships and other significant funding sources that are available for the enterprising student and explores the federal laws that govern student debt He identifies underlying policy decisions that have contributed to the 1.7 trillion federal debt burden and offers several strategies to help individuals navigate student debt without succumbing to it Through planning students can take charge of their education and escape the matrix of ever increasing college costs

Place, Not Race Sheryll Cashin, 2014-05-06 From a nationally recognized expert a fresh and original argument for bettering affirmative action Race based affirmative action had been declining as a factor in university admissions even before the recent spate of related cases arrived at the Supreme Court Since Ward Connerly kickstarted a state by state political mobilization against affirmative action in the mid 1990s the percentage of four year public colleges that consider racial or ethnic status in admissions has fallen from 60 percent to 35 percent Only 45 percent of private colleges still explicitly consider race with elite schools more likely to do so although they too have retreated For law professor and civil rights activist Sheryll Cashin this isn

t entirely bad news because as she argues affirmative action as currently practiced does little to help disadvantaged people. The truly disadvantaged black and brown children trapped in high poverty environs are not getting the quality schooling they need in part because backlash and wedge politics undermine any possibility for common sense public policies. Using place instead of race in diversity programming she writes will better amend the structural disadvantages endured by many children of color while enhancing the possibility that we might one day move past the racial resentment that affirmative action engenders. In *Place Not Race* Cashin reimagines affirmative action and champions place based policies arguing that college applicants who have thrived despite exposure to neighborhood or school poverty are deserving of special consideration. Those blessed to have come of age in poverty free havens are not. Sixty years since the historic decision we are undoubtedly far from meeting the promise of *Brown v Board of Education* but Cashin offers a new framework for true inclusion for the millions of children who live separate and unequal lives. Her proposals include making standardized tests optional, replacing merit based financial aid with need based financial aid and recruiting high achieving students from overlooked places among other steps that encourage cross racial alliances and social mobility. A call for action toward the long overdue promise of equality. *Place Not Race* persuasively shows how the social costs of racial preferences actually outweigh any of the marginal benefits when effective race neutral alternatives are available.

How to Raise an Adult Julie Lythcott-Haims, 2015-06-09 New York Times Bestseller. A provocative manifesto that exposes the harms of helicopter parenting and sets forth an alternate philosophy for raising preteens and teens to self sufficient young adulthood. Julie Lythcott Haims is a national treasure. A must read for every parent who senses that there is a healthier and saner way to raise our children. Madeline Levine, author of the New York Times bestsellers *The Price of Privilege* and *Teach Your Children Well*. In *How to Raise an Adult* Julie Lythcott Haims draws on research on conversations with admissions officers, educators and employers and on her own insights as a mother and as a student dean to highlight the ways in which overparenting harms children, their stressed out parents and society at large. While empathizing with the parental hopes and especially fears that lead to overhelping, Lythcott Haims offers practical alternative strategies that underline the importance of allowing children to make their own mistakes and develop the resilience, resourcefulness and inner determination necessary for success. Relevant to parents of toddlers as well as of twentysomethings and of special value to parents of teens, this book is a rallying cry for those who wish to ensure that the next generation can take charge of their own lives with competence and confidence. For parents who want to foster hearty self reliance instead of hollow self esteem, *How to Raise an Adult* is the right book at the right time. Daniel H. Pink, author of the New York Times bestsellers *Drive* and *A Whole New Mind*.

Access and Expansion Post-Massification Ben Jongbloed, Hans Vossensteyn, 2015-12-14. This edited collection addresses the crucial issues emerging from the ongoing expansion of higher education focusing on how national systems of higher education can respond further, expand when traditional routes to have been largely exhausted.

Failing Law Schools

Brian Z. Tamanaha, 2012-06-15 On the surface law schools today are thriving Enrollments are on the rise and their resources are often the envy of every other university department Law professors are among the highest paid and play key roles as public intellectuals advisers and government officials Yet behind the flourishing facade law schools are failing abjectly Recent front page stories have detailed widespread dubious practices including false reporting of LSAT and GPA scores misleading placement reports and the fundamental failure to prepare graduates to enter the profession Addressing all these problems and more in a ringing critique is renowned legal scholar Brian Z Tamanaha Piece by piece Tamanaha lays out the how and why of the crisis and the likely consequences if the current trend continues The out of pocket cost of obtaining a law degree at many schools now approaches 200 000 The average law school graduate s debt is around 100 000 the highest it has ever been while the legal job market is the worst in decades with the scarce jobs offering starting salaries well below what is needed to handle such a debt load At the heart of the problem Tamanaha argues are the economic demands and competitive pressures on law schools driven by competition over U S News and World Report ranking When paired with a lack of regulatory oversight the work environment of professors the limited information available to prospective students and loan based tuition financing the result is a system that is fundamentally unsustainable Growing concern with the crisis in legal education has led to high profile coverage in the Wall Street Journal and the New York Times and many observers expect it soon will be the focus of congressional scrutiny Bringing to the table his years of experience from within the legal academy Tamanaha has provided the perfect resource for assessing what s wrong with law schools and figuring out how to fix them

Tyner-Mullings, 2015-11-17 Enter the Alternative School is an in depth examination of public school alternatives to traditional educational models in the US This book analyses how urban education can respond to a system growing increasingly standardised and privatised As an example Central Park East Secondary School CPESS a public alternative schooling model successfully served predominantly low income and minority students It also changed the New York City public school system while promoting methods that allowed educational institutions to make changes in the lives of their students Written by a sociologist who was both a student at CPESS and a teacher at a school developed from the CPESS model the book analyses education from a range of vantage points assesses outcomes and invites readers to consider the potential of alternative

educational models to address the challenges of reforms that attempt to provide quality education to the low income and minority students otherwise under served by public schools

Monitoring the Health of U.S. Professional Athletes

Amadu Jacky Kaba, 2014-03-20 Monitoring the Health of US Professional Athletes examines the health status of professional athletes in the United States with a focus on the body mass index BMI of players in the National Basketball Association NBA and the Women's National Basketball Association WNBA for the 2005 2006 season The study presents demographic data of the players such as age height weight race nationality and academic institutions attended It also presents data on the salaries of the players Although public health scholars and medical doctors have cautioned that professional athletes such as basketball and American Football players are more likely to have relatively high BMI due to their muscle mass the fact that 50 percent of the NBA players in this study have an average BMI that placed them in the overweight category shows that there is a prevalence of overweight players in the league The study discusses the implications of this for the health of the athletes and the game of basketball in general

Metrics That Matter

Zachary Bleemer, Mukul Kumar, Aashish Mehta, Chris Muellerleile, Christopher Newfield, 2023-03-21 Colleges sell themselves by the numbers rankings returns on investments and top ten lists but these often mislead prospective students What numbers should they really be paying attention to High school and college students are inundated by indicators and rankings supposedly designed to help them decide where to go to college and what to study once they arrive In Metrics That Matter coauthors Zachary Bleemer Mukul Kumar Aashish Mehta Chris Muellerleile and Christopher Newfield take a critical look at these metrics and find that many of the most popular ones are confusing misleading and most importantly easily replaceable by more helpful alternatives Metrics That Matter explores popular metrics used by future and current college students with chapters focusing on colleges return on investment university rankings average student debt average wages by college major and more Written for students their families and the counselors who advise them each chapter explains a common metric's fundamental flaws when used as a basis for making important educational decisions The authors then draw on decades of scholarship from many academic fields to pair each metric with a concrete recommendation for alternative information both qualitative and quantitative that would be more useful and meaningful for students to consider They

emphasize that students should be thinking beyond solely using metrics when making college decisions students should focus on their intellectual and academic education goals not just vocational or monetary ones Students reliance on certain metrics has skewed universities away from providing high quality education and distorted the perception of higher education s purpose overemphasizing private financial returns over the broader economic and social benefits of universities This book aims to facilitate important student decisions while reorienting public perceptions of higher education s values and how universities should measure their own success
