*The United States, Russia, and China* Paul J. Bolt,Su Changhe,Sharyl Cross,2008-04-30 In the brief experience the world has had during the post 9 11 era much has been made of the need for sharing intelligence in the war on terror and a lot of emphasis has been placed on the desirability of interfaith dialogue between Christians and Muslims But comparatively little attention has been paid to a crucial component of intercultural cooperation on the key global security issues facing the world today that between and among the United States Russia and China This book examines key security issues of the day from the perspectives of those three powers From an American perspective Russia represents an erstwhile enemy of the Cold War era who has the potential to become an ally while China is poised to become either an enemy an ally or an economic rival depending on whom you listen to From a Russian perspective the United States is a former ally during World War II turned Cold War enemy turned lone superpower with the potential for cooperation and conflict while China has always embodied both ally and rival even during the Communist era To the Chinese who have had rivalries and cooperative relations with both powers the United States is currently a valued supplier of both raw materials and a vast market for Chinese goods while Russia and the United States are rivals in the scramble for influence in the Middle East and elsewhere With such a complicated history and with a future fraught with all sorts of possibilities how can these three key powers cooperate in managing and responding to global security threats and terrorism This book examines key issues of the day including the threat posed by al Qaeda WMD energy security environmental security ethnic and religious conflicts and a nuclear North Korea from the perspectives of the United States Russia and China Each chapter is written by scholars from at least two of the three countries In this manner the book embodies that which it seeks to demonstrate becoming in itself an artifact of intercultural cooperation in the new international security environment      The Earth Policy Reader Lester R. large organisations and criminal networks This report examines the scale of the illegal timber trade in the Asia Pacific region encompassing the processes and current trends in logging sourcing trafficking manufacturing importing and consumption of illegal timber and timber products Assessments of countries timber resources extent of illegal logging policies and legislation and enforcement initiatives show the efficacy of local regional national and international legislative frameworks and actions to suppress illegal trade The report highlights the need for cooperative policies and regulations between countries to resolve sovereignty issues share information and develop standards Issues addressing monitoring the transit of timber and timber products would identify weaknesses in governance laws policies and enforcement Potential research that identifies the causes of the trade economic dimensions and legal frameworks combined with government intelligence would inform policymaking
