Urban Ecology Richard T. T. Forman, 2014-02-13 The first richly illustrated worldwide portrayal of urban ecology tying together organisms built structures and the physical environment around cities

Resilience in Ecology and Urban Design S.T.A. Pickett, M.L. Cadenasso, Brian McGrath, 2013-01-13 The contributors to this volume propose strategies of urgent and vital importance that aim to make today s urban environments more resilient Resilience the ability of complex systems to adapt to changing conditions is a key frontier in ecological research and is especially relevant in creative urban design as urban areas exemplify complex systems With something approaching half of the world s population now residing in coastal urban zones many of which are vulnerable both to floods originating inland and rising sea levels making urban areas more robust in the face of environmental threats must be a policy ambition of the highest priority The complexity of urban areas results from their spatial heterogeneity their intertwined material and energy fluxes and the integration of social and natural processes All of these features can be altered by intentional planning and design The complex integrated suite of urban structures and processes together affect the adaptive resilience of urban systems but also presupposes that planners can intervene in positive ways As examples accumulate of linkage between sustainability and building landscape design such as the Shanghai Chemical Industrial Park and Toronto s Lower Don River area this book unites the ideas data and insights of ecologists and related scientists with those of urban designers It aims to integrate a formerly atomized dialog to help both disciplines promote urban resilience

The Routledge Handbook of Urban Ecology Ian Douglas, P M L Anderson, David Goode, Michael C. Houck, David Maddox, Harini Nagendra, Puay Yok Tan, 2020-12-15 This second edition covers recent developments around the world with contributors from 33 different countries It widens the handbook s scope by including

ecological design consideration of cultural dimensions of the use and conservation of urban nature the roles of government and civil society and the continuing issues of equity and fairness in access to urban greenspaces New features include an emphasis on the biophilic design of homes and workplaces demonstrating the value of nature in order to counter the still prevalent attitude among many developers that nature is a constraint rather than a value The volume explores great practical achievements that have occurred since the first edition with many governments increasingly recognizing and legislating on urban nature and green infrastructure matters since cities play a major role in adapting to change particularly to climate crisis New topics such as the ecological role of light at night and human microbiota in the urban ecosystem are introduced Additional attention is given to food production in cities particularly the multiple roles of urban agriculture and household gardens in different contexts from wealthy communities to the poorest informal settlements in deprived communities The emphasis is on demonstrating what can be achieved and what is already being done The book aims to help scholars and graduate students by providing an invaluable and up to date guide to current urban ecological thinking across the range of disciplines such as geography ecology environmental science studies planning and urban studies that converge in the study of towns and cities and urban design and living It will also assist practitioners and civil society members in discovering the ways different specialists and thinkers approach urban nature

Urban Environment Sébastien Rauch, Gregory

Morrison, Stefan Norra, Nina Schleicher, 2013-12-09 Over half of the global population now lives in cities This ongoing urbanisation is making it increasingly important to adequately manage urban systems and preserve urban environments This book is the outcome of the 11th Urban Environment Symposium UES held on 16-19 September 2012 in Karlsruhe Germany The UES aims at providing a forum on the sciences and practices needed to promote a sustainable future in urban environments Papers by leading experts are presented in sections on Urban Management and Spatial Planning Green Cities and Urban Ecosystems Urban Planning and Development Air Quality and Noise Urban Climate Change and Adaptation and Contamination of Urban Waters and its Effects

Urban Ecology Philip James, Ian Douglas, 2014-10-30 Urban Ecology An

Introduction seeks to open the reader's mind and eyes to the way in which nature permeates everyday urban living and how it has to be understood cared for and managed in order to make our towns and cities healthier places to visit and in which to live and work The authors examine how nature can improve our physical and mental health the air we breathe and the waters we use as well as boosting our enjoyment of parks and gardens Urban Ecology sets out the science that underlies the changing natural scene and the tools used to ensure that cities become both capable of adapting to climate change and more beautiful and resilient The book begins with a discussion of the nature of urban places and the role of nature in towns and cities Part 1 looks at the context and content of urban ecology its relationship to other foci of interest within ecology and other environmental sciences and the character of city landscapes and ecosystems In Part 2 the authors set out the physical and chemical components of urban ecosystems and ecological processes including urban weather and climate urban
