The Politics of Civic Education Eleni M. Mantas-Kourounis,2024-06-10 This book chronicles the progression of civic education advocacy since the early 2000s It identifies the main actors that called for civic education reform describes their motivations and policy platforms and documents the path taken to capture state policy agendas It argues that No Child Left Behind incentivized civic education advocates to mobilize a call to action to restore emphasis on civics that materialized into national policy reform proposals that successfully captured the agendas of state legislatures and bureaucracies This book analyzes the implementation and sustainability of these civic education policy reforms by undertaking a comparative case study analysis of school districts in Utah and Connecticut Through the voices of teachers and district administrators the book tells the story of what happened when these state policy reforms inspired by national initiatives hit the local level where the rubber meets the road As ideological debates about schools and democracy unfold across the country as civic education advocates and proposals proliferate this book treats civic education not as panacea but as a concrete policy area to be analyzed and understood It contextualizes the current debate and offers a critical assessment of the most recent comprehensive state level civic education policy reform It argues that while questions linger about what type of civic inspired educational interventions remains most effective for whom where and why the implementation of such interventions are profoundly impacted by local actors and local politics and that future initiatives should take this dimension into consideration

Gorlewski, David A. Gorlewski, 2012-09-05 This book provides no answer key If you are looking for one right answer go elsewhere Implicit in the current educational reform movement towards standards and standardization is the belief that the work of teachers is quantifiable that the hours and days of contact time between teachers and students can be reduced to a number that has meaning in short that there is one right answer Making it Real Case Stories for Secondary Teachers focuses not on the episodic nature of the standardized test but on those hours and days of contact time that represent the essence of what teachers do on a daily basis Within that context teachers are called upon to make hundreds of decisions each day decisions which require knowledge and expertise about planning learner development content knowledge student assessment and ethical practice among many others These decisions are not made easily and cannot be quantified because they take place in the complex world of human nature and human activity where values and priorities conflict and often clash The teachers administrators and students in Making it Real Case Stories for Secondary Teachers represent the day to day situations relationships conflicts and dilemmas that exist in every school No formulas are presented No secrets are revealed Rather the authors provide a template for analysis that encourages readers to place themselves in these real life school settings and consider the causes and consequences of their decisions for themselves their students and society as a whole Bulletin ,1918 **Retinoscopy (or shadow test)** James Thorington, 1899 **How to Prepare for the SAT I** Sharon Weiner Green, Ira K.
