U.S. News & World Report ,2007 *Research Analytics* Francisco J. Cantu-Ortiz,2017-10-25 The growth of machines and users of the Internet has led to the proliferation of all sorts of data concerning individuals institutions companies governments universities and all kinds of known objects and events happening everywhere in daily life Scientific knowledge is not an exception to the data boom The phenomenon of data growth in science pushes forth as the number of scientific papers published doubles every 9 15 years and the need for methods and tools to understand what is reported in scientific literature becomes evident As the number of academicians and innovators swells so do the number of publications of all types yielding outlets of documents and depots of authors and institutions that need to be found in Bibliometric databases These databases are dug into and treated to hand over metrics of research performance by means of Scientometrics that analyze the toil of individuals institutions journals countries and even regions of the world The objective of this book is to assist students professors university managers government industry and stakeholders in general understand which are the main Bibliometric databases what are the key research indicators and who are the main players in university rankings and the methodologies and approaches that they employ in producing ranking tables The book is divided into two sections The first looks at Scientometric databases including Scopus and Google Scholar as well as institutional repositories The second section examines the application of Scientometrics to world class universities and the role that Scientometrics can play in competition among them It looks at university rankings and the methodologies used to create these rankings Individual chapters examine specific rankings that include QS World University Scimago Institutions Webometrics U Multirank U S News World Report The book concludes with a discussion of university performance in the age of research analytics

Rankings and the Reshaping of Higher Education E. Hazelkorn,2011-03-08 University rankings have gained popularity around the world and are now a significant factor shaping reputation This book is the first comprehensive study of rankings from a global perspective making an important contribution to our understanding of the rankings phenomenon This book has also been published in Japanese **Research Handbook on University Rankings** Hazelkorn, Ellen,Mihut, Georgiana,2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact

Indianapolis Monthly ,2001-04 Indianapolis Monthly is the Circle City s essential chronicle and guide an indispensable authority on what s new and what s news Through coverage of politics crime dining style business sports and arts and entertainment each issue offers compelling narrative stories and lively urbane coverage of Indy s cultural landscape U.S. News and World Report ,2007 **Performance** Richard L. Alfred,2012 Organizational Performance Core Concepts Conceptions of Performance Thinking Differently The Complexity of Human Rights Philip Alston,2024-02-08 This book

provides the first systematic assessment from a human rights law perspective of the landmark contributions of the renowned legal anthropologist Sally Engle Merry. What impact does over simplification have on human rights debates? The understandable tendency to present them as a single universal and immutable concept ignores their complexity and by extension only serves to weaken them. Merry and her colleagues transformed human rights thinking by highlighting the process of vernacularization which sees rights discourse as being unavoidably dependent upon translation and interpretation. She also warned of the pitfalls of excessive reliance upon statistical and other indicators through the process of quantification. Here the leading voices in the field assess the significance of these contributions. **Find a Way Or Make**

One Alma J. Carten, 2021. Clark Atlanta University. Whitney M Young Jr School of Social Work was founded in 1920 in Atlanta Georgia as the Atlanta School of Social Work to prepare social workers for practice in underserved black neighborhoods. Spearheaded by black scholars and progressive whites during an era of racial segregation, 2020 marks its centennial as the first accredited social work program at a historically black college and university. In this book, social work professor Alma J. Carten describes the School's transitions from its beginnings amid the pervasive racism sanctioned by Supreme Court rulings in the Dred Scott and Plessy v Ferguson cases through the decades of 20th century progressive civil rights reforms and into the new conservatism of the 21st century. Referencing archival documents, Carten illustrates the School's commitment to the democratic principles of the profession despite the blatant racism of the segregated South and the less visible structural inequalities following desegregation from which mainstream social work education was not immune. The book describes the influence of iconic thought leaders on the School's culture and academic programs beginning with Jesse O. Thomas's speech on the need for a black school of social work given from the segregated section of the 1920 National Conference on Social Work and including W. E. B. DuBois, Atlanta University Studies that pioneered the model of social progress powered by science, E. Franklin Frazier and Forrester B. Washington who championed black social work and the integration of race critical content in the curriculum of all schools, and Whitney M. Young Jr who chastised social workers for their waning interest in advocacy for marginalized populations and encouraged them to become politically active. Carten examines the evolution of the School within the context of changes in US social welfare policy, CSWE accrediting standards and NASW Code of Ethics. Highly readable, the book brings to light the under reported contributions of HBCU social work programs to social work education and it thoughtfully engages with the School's efforts to legitimize the Afrocentric perspective and the humanistic values embraced by HBCU social work programs. Social Justice and Community College Education Bryan Reece, 2021-07-05. This book explores the central role community colleges play in American social justice. The United States has long standing social and cultural structures that perpetuate inequality along race, ethnicity and income lines. The primary role of American community colleges is to disrupt these structures on behalf of the students we serve. In this sense, community colleges are called to play a subversive role in contemporary society, but it is a good kind of subversion. Social Justice and Community

College Education makes four very important contributions to this conversation First the book helps us quantify and understand the size and dimension of the equity gaps in higher education by tracking ten specific student groups from historically underserved communities Second the book summarizes best practices research and literature with regard to pedagogy services programs and leadership in community colleges presenting practical strategies for implementation Third through a national survey of community college personnel the book covers significant new territory in the discussion of work we need to do collaboratively as community colleges Fourth this book captures the unique and special mission of American community colleges Our work is the work of social justice and we carry this work out in society at a greater volume with greater intentionality and through greater expertise than any other sector of higher education In this arena community colleges should lead

The Lawyer Bubble Steven J Harper, 2016-03-08 A noble profession is facing its defining moment From law schools to the prestigious firms that represent the pinnacle of a legal career a crisis is unfolding News headlines tell part of the story the growing oversupply of new lawyers widespread career dissatisfaction and spectacular implosions of pre eminent law firms Yet eager hordes of bright young people continue to step over each other as they seek jobs with high rates of depression life consuming hours and little assurance of financial stability The Great Recession has only worsened these trends but correction is possible and now imperative In *The Lawyer Bubble* Steven J Harper reveals how a culture of short term thinking has blinded some of the nation's finest minds to the long run implications of their actions Law school deans have ceded independent judgment to flawed U S News World Report rankings criteria in the quest to maximize immediate results Senior partners in the nation's large law firms have focused on current profits to enhance American Lawyer rankings and individual wealth at great cost to their institutions Yet wiser decisions being honest about the legal job market revisiting the financial incentives currently driving bad behavior eliminating the billable hour model and more can take the profession to a better place A devastating indictment of the greed shortsightedness and dishonesty that now permeate the legal profession this insider account is essential reading for anyone who wants to know how things went so wrong and how the profession can right itself once again

University Rankings Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties Critical Essays in Sport Management Andy Gillentine,Robert Baker,Jacquelyn Cuneen,2017-09-29 This collection of essays written by a number of respected sport management scholars addresses many of the challenges and issues facing today s sport management academic programs It is intended to begin a professional and scholarly discussion to identify the best or at least the most logical paths to follow for sport management programs and the industry with which they are so closely aligned Contributors invited to participate based on their recognized areas of expertise address specific topics using their own unique voices and writing styles In the ebook version essays link to video introductions by the authors and to online discussion forums where readers can respond to the issues presented in the essays From the Preface The field of sport management stands at an academic crossroads the essays in this book address the following and other emerging questions Should our successful field of study continue to model other disciplines and perpetuate their successes as well as their shortcomings or should we determine our own specific model for academic success How are we doing in preparing future

sport managers to perform in the industry and on the global stage Where do we belong in the scheme of academe The book's goal is to generate discussion among sport management professors industry professionals who serve as adjunct faculty and participate on sport management program advisory boards doctoral students who intend to teach in sport management programs and others who explore and critique higher education in general

Higher Education in the United States James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis

Higher Education in the Global Age Daniel Araya, Peter Marber, 2013-11-20 Discussions on globalization now routinely focus on the economic impact of developing countries in Asia Africa the Middle East the former Soviet Union and Latin America Only twenty five years ago many developing countries were largely closed societies Today the growing power of emerging markets is reordering the geopolitical landscape On a purchasing power parity basis emerging economies now constitute half of the world's economic activity Financial markets too are seeing growing integration Asia now accounts for 1/3 of world stock markets more than double that of just 15 years ago Given current trajectories most economists predict that China and India alone will account for half of global output by 2050 almost a complete return to their positions prior to the Industrial Revolution How is higher education shaping and being shaped by these massive tectonic shifts As education rises as a geopolitical priority it has converged with discussions on economic policy and a global labor market As part of the Routledge Studies in Emerging Societies series this edited collection focuses on the globalization of higher education particularly the increasing symbiosis between advanced and developing countries Bringing together senior scholars journalists and practitioners from around the world this collection explores the relatively new and changing higher education landscape
