Other important players include the courts, interest groups, media, trade associations, the Congress, and parties. The key advisers to the president include the heads of the departments of Treasury, Homeland Security, Defense, and State and heads of agencies such as the National Security Council, the Central Intelligence Agency, and the Joint Chiefs (Howe et al., 2010).

The Role and Functions of the Key Players

The executive branch and the president play an important role in the development of a foreign policy, and they are responsible for executing it. With the consent and the advice of the Senate, the president appoints ambassadors and makes treaties. The president is capable of holding summit meetings with the global leaders. Through the executive order and acting as the commander in chief of the military, the president can quickly project the United States power around the world. In making the American foreign policy, the president depends on the advice from the National Security Council (Constitutional Rights Foundation, 2012).

The secretary of state is the head of the United States State Department, and usually represents the president in other nations. The Department of State assists the secretary of state in playing his or her role as the chief foreign adviser of the president, and the main executor of the foreign policy (Harris and Tichenor, 2009). The Department of State executes the foreign policy decisions, and assists in the development of a foreign policy for every area of the universe. The Congress also plays a significant role in the development of the American foreign policy through its powers to regulate immigration and foreign commerce, set tariffs and duties on foreign imports and exports, and even declares war. However, the major role of the Congress is to

Race and U.S. Foreign Policy from Colonial Times Through the Age of Jackson E. Nathaniel Gates, 2021-12-24 First published in 1998 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source

War and Ideas John Mueller, 2013-09-13 This book collects the key essays together with updating notes and commentary of Professor John Mueller on war and the role of ideas and opinions Mueller has maintained that war and peace are in essence merely ideas and that war has waned as the notion that peace is a decidedly good idea has gained currency The first part of the book extends this argument noting that as ideas have spread war is losing out not only in the developed world but now in the developing one and that even civil war is in marked decline It also assesses and critiques theories arguing that this phenomenon is caused by the rising acceptance of democracy and or capitalism The second part argues that the Cold War

was at base a clash of ideas that were seen to be threatening not of arms balances domestic systems geography or international structure It also maintains that there has been a considerable tendency to exaggerate security threats currently in particular the one presented by international terrorism and to see them in excessively military terms The third section deals with the role public opinion plays in foreign policy and argues that many earlier conclusions about opinion during the Korean and Vietnam Wars including especially ones concerning the importance of casualties in determining popular support for war apply to more recent military ventures in the Persian Gulf Bosnia Iraq and Afghanistan It also assesses the difficulties leaders and idea entrepreneurs often encounter when they try to manage or manipulate public opinion This book will be of much interest to students of international relations security studies foreign policy and international history *Thinking Otherwise* Susan A.
