Bergveld,W.S. Kruijt,P.H.L Notten,2013-03-09 Battery Management Systems Design by Modelling describes the design of Battery Management Systems BMS with the aid of simulation methods The basic tasks of BMS are to ensure optimum use of the energy stored in the battery pack that powers a portable device and to prevent damage inflicted on the battery pack This becomes increasingly important due to the larger power consumption associated with added features to portable devices on the one hand and the demand for longer run times on the other hand In

addition to explaining the general principles of BMS tasks such as charging algorithms and State of Charge SoC indication methods the book also covers real life examples of BMS functionality of practical portable devices such as shavers and cellular phones Simulations offer the advantage over measurements that less time is needed to gain knowledge of a battery's behaviour in interaction with other parts in a portable device under a wide variety of conditions This knowledge can be used to improve the design of a BMS even before a prototype of the portable device has been built The battery is the central part of a BMS and good simulation models that can be used to improve the BMS design were previously unavailable Therefore a large part of the book is devoted to the construction of simulation models for rechargeable batteries With the aid of several illustrations it is shown that design improvements can indeed be realized with the presented battery models Examples include an improved charging algorithm that was elaborated in simulations and verified in practice and a new SoC indication system that was developed showing promising results The contents of Battery Management Systems Design by Modelling is based on years of research performed at the Philips Research Laboratories The combination of basic and detailed descriptions of battery behaviour both in chemical and electrical terms makes this book truly multidisciplinary It can therefore be read both by people with an electro chemical and an electrical engineering background Advances in Green Energy Systems and Smart Grid Kang Li, Jianhua Zhang, Minyou Chen, Zhile Yang, Qun Niu, 2018-09-04 The three volume set CCIS 923 CCIS 924 and CCIS 925 constitutes the thoroughly refereed proceedings of the First International Conference on Intelligent Manufacturing and Internet of Things and of the 5th International Conference on Intelligent Computing for Sustainable Energy and Environment ICSEE 2018 held in Chongqing China in September 2018 The 135 revised full papers presented were carefully reviewed and selected from over 385 submissions The papers of this volume are organized in topical sections on clean energy electric vehicles energy saving energy storages power system analysis **Smart Healthcare for Disease Diagnosis and Prevention** Sudip Paul, Dinesh Bhatia, 2020-01-14 Smart Healthcare for Disease Diagnosis and Prevention focuses on the advancement in healthcare technology to improve human health at all levels using smart technologies It covers all necessary topics from basic concepts such as signal and image processing to advanced knowledge on topics such as tissue engineering virtual and intelligent instrumentation or VLSI and Embedded Systems This book can be used to guide students and young researchers providing basic knowledge on signal image processing and smart technologies Users will find a perfect blend of the interdisciplinary approach to biomedical engineering The book considers many technical concepts emerging technologies real world healthcare applications and many other technical multidisciplinary notions in the same content Finally it systemically introduces the technologies and devices for healthcare objects and targets disease diagnosis and prevention in different views Discusses how new advanced technologies are used in real healthcare applications to improve patient safety Explores how medical data such as signals and images can be used in diagnosis Covers how wireless communications devices such as sensor networks RFID wireless body area network and
