Education in a Smart Learning Environment Simon K. S. Cheung, Richard Li, Kongkiti Phusavat, Naraphorn Paoprasert, Lam-For Kwok, 2020-07-17 This book constitutes the refereed proceedings of the 13th International Conference on Blended Learning ICBL 2020 held in Bangkok in August 2020 The 33 papers presented were carefully reviewed and selected from 70 submissions The conference theme of ICBL 2020 is Blended Learning Education in a Smart Learning Environment The papers are organized in topical sections named Blended Learning Hybrid Learning Online Learning Enriched and Smart Learning Learning Management System and Content and Instructional Design Citizen, Territory and Technologies: Smart Learning Contexts and Practices Óscar Mealha, Monica Divitini, Matthias Rehm, 2017-06-21 This book gathers a selection of the articles accepted for presentation and discussion at the 2nd International Conference on Smart Learning Ecosystems and Regional Developments SLERD 2017 held 22-23 June What characterizes smart learning ecosystems What is their role in city and regional development and innovation How can we promote the engagement of citizens in smart learning ecosystems These are some of the questions addressed at SLERD 2017

and documented here The proceedings include scientific papers that endeavor to understand devise and promote innovative human centric design and development methods education training practices informal social learning and citizen driven policies The individual papers elaborate on the notion of smart learning ecosystems study the relation of smart learning ecosystems with As such they help to foster the social innovation sectors Information and Communication Technology ICT and economic development and deployment strategies alongside new policies for smarter proactive citizens making them a valuable resource for researchers and policymakers alike

Assembling Moral Mobilities Nicholas A. Scott, 2020-02-01 In the years since the new mobilities paradigm burst onto the social scientific scene scholars from various disciplines have analyzed the social cultural and political underpinnings of transport contesting its long dominant understandings as defined by engineering and economics Still the vast majority of mobility studies and even key works that mention the good life and its dependence on the car fail to consider mobilities in connection with moral theories of the common good In *Assembling Moral Mobilities* Nicholas A Scott presents novel ways of understanding how cycling and driving animate urban space place and society and investigates how cycling can learn from the ways in which driving has become invested with moral value By jointly analyzing how driving and cycling reassembled the good city between 1901 and 2017 with a focus on various cities in Canada in Detroit and in Oulu Finland Scott confronts the popular notion that cycling and driving are merely antagonistic systems and challenges social scientific research that elides morality and the common good Instead of pitting bikes against cars *Assembling Moral Mobilities* looks at five moral values based on canonical political philosophies of the common good and argues that both cycling and driving figure into larger more important moral assemblages of mobility finally concluding that the deeper meta lesson that proponents of cycling ought to take from driving is to focus on ecological responsibility equality and home at the expense of neoliberal capitalism Scott offers a fresh perspective of mobilities and the city through a multifaceted investigation of cycling informed by historical lessons of automobility

Polyphonic Construction of Smart Learning Ecosystems Mihai Dascalu, Patrizia Marti, Francesca Pozzi, 2022-09-27 The book brings together the contributions of the 7th International Conference on Smart Learning Ecosystems and Regional Development SLERD 2022 which aims at promoting reflection and discussion concerning R D work policies case studies and entrepreneur experiences with a special focus on understanding the relevance of smart learning ecosystems e g schools campus working places informal learning contexts etc for regional development and social innovation and how the effectiveness of the relation of citizens and smart ecosystems can be boosted This forum has a special interest in understanding how technology mediated instruments can foster the citizen s engagement with learning ecosystems and territories namely by understanding innovative human centric design and development models techniques education training practices informal social learning innovative citizen driven policies technology mediated experiences and their impact This set of concerns will contribute to foster the social innovation sectors and ICT and economic development and deployment strategies alongside new policies for smarter proactive citizens

Big Data Analytics for Smart Transport and Healthcare Systems Saeid Pourroostaei Ardakani, Ali

Cheshmehzangi, 2023-12-03 This book aims to introduce big data solutions in urban sustainability applications mainly smart transportation and healthcare systems. It focuses on machine learning techniques and data processing approaches which have the capacity to handle process huge live and complex datasets in real time transportation and healthcare applications. For this several state of the art data processing approaches including data pre processing classification regression and clustering are introduced tested and evaluated to highlight their benefits and constraints where data is sensitive real time and or semi structured

Mobile Learning: Pilot Projects and Initiatives Retta Guy, 2010 This book examines the meaning as well as the benefits and barriers of mobile learning details various global projects and initiatives that showcase the development and delivery of mobile learning and traces the history of mobile learning to the present and provides a glimpse into the future of mobile education and the technologies used to facilitate the learning process

Mobile Lenses on Learning Mark Pegrum, 2020-01-01 This book explores mobile learning as a form of learning particularly suited to our ever more mobile world presenting a new conceptualisation of the value of mobile devices in education through the metaphor of lenses on learning. With a principal focus on mobile assisted language learning MALL it draws on insights derived from MALL language literacy and cultural projects to illustrate the possibilities inherent in all mobile learning. In its broad sweep the book takes in new and emerging technologies and tools from robots to holograms virtual reality to augmented reality and smart glasses to embeddable chips considering their potential impact on education and indeed on human society and the planet as a whole. While not shying away from discussing the risks it demonstrates that handled appropriately mobile context aware technologies allow educators to build on the personalised and collaborative learning facilitated by web 2.0 and social media but simultaneously to go much further in promoting authentic learning experiences grounded in real world encounters. In this way teachers can better prepare students to face a global mobile future with all of its evolving possibilities and challenges

Intelligent Cyber-Physical Systems for Autonomous Transportation Sahil Garg, Gagangeet Singh Aujla, Kuljeet Kaur, Syed Hassan Ahmed Shah, 2022-04-27 This book provides comprehensive discussion on key topics related to the usage and deployment of AI in urban transportation systems including drones. The book presents intelligent solutions to overcome the challenges of static approaches in the transportation sector to make them intelligent adaptive agile and flexible. The book showcases different AI deployment models algorithms and implementations related to intelligent cyber physical systems CPS along with their pros and cons. Even more this book provides deep insights into the CPS specifically about the layered architecture and different planes interfaces and programmable network operations. The deployment models for AI based CPS are also included with an aim towards the design of interoperable and intelligent CPS architectures by researchers in future. The authors present hands on practical implementations deployment scenarios and use cases related to different transportation scenarios. In the end the design and research challenges open issues and future research directions are

Green Mobile Cloud Computing Debashis De,Anwesha Mukherjee,Rajkumar Buyya,2022-10-06 The primary purpose of this book is to present the state of the art of mobile cloud computing and applications with an emphasis on energy efficiency The future research directions are also highlighted in this book to enrich the global market place of mobile cloud computing services facilitating the scientific industrial business and consumer applications We expect that the book will serve as a reference to a large number of readers including researchers system architects practitioners and graduate level students This book focuses on an emerging area that has considerable research interest momentum and interest of commercial developers The target reader of this book are professional developers under graduate and post graduate students and

researchers As mobile cloud computing as well as green computing will have a major impact on the quality of science and society over the next few years its knowledge will enrich our readers to be at the forefront of the field This book reports the latest research advances in the area of green mobile cloud computing The book covers the architecture services methods applications and future research directions of green mobile cloud computing *Resources in Education* ,1996

INQUIRIES INTO EDUCATION: COMPLEXITY, CHANGE, AND THE CONTEMPORARY CONDITION PROF. DR.

MUHLİSE COŞGUN ÖGEYİK, Assoc. Prof. Dr. Kutay Uzun, 2025-08-25 The world of education is continuously changing a complex and dynamic environment where old ideas meet new challenges This book *Inquiries into Education Complexity Change and the Contemporary Condition* is a collection of research that deals with some of the most important issues in education today The chapters explore a variety of topics from the subtle details of language learning to the effect of technology on education and the need for inclusive teaching practices The studies in this volume work together to help us understand and navigate these complex topics The focal point of some of the studies is second language acquisition exploring its theories and practical implications They investigate the strategies that help future teachers improve their speaking skills and examine the relationship between linguistic complexity and writing quality in L2 English Furthermore less obvious issues such as organizational silence among foreign language teachers and the key role feedback plays in developing pedagogical content knowledge are also addressed The volume also takes on bigger themes within the scope of education The role of artificial intelligence in the development of L2 English speaking skills and how mindfulness can create a more centered and effective learning experience are also discussed In addition important social issues such as how preschool teacher candidates feel about inclusive education and refugee students and how functional language is used in a 12th grade English textbook are also examined Each chapter is its own investigation but together they form a conversation about the current issues in education They ask questions regarding how we should react to change and how we can handle complexity without feeling overwhelmed The answers are not simple but they are encouraging They suggest that through careful research and thoughtful teaching we can continue to build a better fairer and more humane educational environment iv We are grateful to the authors for their meticulous work which has made this book a valuable resource for educators researchers and students We hope you will find their insights useful and inspiring Prof Dr Muhlise Co gun geyik Assoc Prof Dr Kutay Uzun **Hybrid**

Intelligent Approaches for Smart Energy John A, Senthil Kumar Mohan, Sanjeevikumar Padmanaban, Yasir

Hamid, 2022-11-08 **HYBRID INTELLIGENT APPROACHES FOR SMART ENERGY** Green technologies and cleaner energy are two of the most important topics facing our world today and the march toward efficient energy systems smart cities and other green technologies has been and continues to be a long and intricate one Books like this one keep the veteran engineer and student alike up to date on current trends in the technology and offer a reference for the industry for its practical applications Energy optimization and consumption prediction are necessary to prevent energy waste schedule energy usage

and reduce the cost Today smart computing technologies are slowly replacing the traditional computational methods in energy optimization consumption scheduling and usage Smart computing is an important core technology in today s scientific and engineering environment Smart computation techniques such as artificial intelligence machine learning deep learning and Internet of Things IoT are the key role players in emerging technologies across different applications industries and other areas These newer smart computation techniques are incorporated with traditional computation and scheduling methods to reduce power usage in areas such as distributed environment healthcare smart cities agriculture and various functional areas The scope of this book is to bridge the gap between traditional power consumption methods and modern consumptions methods using smart computation methods This book addresses the various limitations issues and challenges of traditional energy consumption methods and provides solutions for various issues using modern smart computation technologies These smart technologies play a significant role in power consumption and they are cheaper compared to traditional technologies The significant limitations of energy usage and optimizations are rectified using smart computations techniques and the computation techniques are applied across a wide variety of industries and engineering areas Valuable as reference for engineers scientists students and other professionals across many areas this is a must have for any library
