Smart Graphics Andreas Butz, Brian Fisher, Antonio Krüger, Patrick Olivier, Marc Christie, 2008-08-25 For centuries artists and designers have been creating communicative graphics With the advent of new forms of media the emergence of paradigms such as ubiquitous computing and the rapid evolution of interaction devices there is a continuous cycle of renewal of the technologies and methods to support artists interaction designers and developers

Developing new approaches requires an understanding of the fundamentals of perception and cognition as they relate to interaction and communication technologies together with artificial intelligence and computer graphics techniques to automate reasoning and enhance cognition Smart Graphics is in essence an interdisciplinary endeavor and brings together the fields of computer graphics artificial intelligence cognitive science graphic design and new art The International Symposium on Smart Graphics 2008 was held on August 27-29 in Rennes France It was the ninth event in a series which originally started in 2000 as an American Association for Artificial Intelligence Spring Symposium and has taken place every year since then Due to the high quality of the papers submitted this year the Program Committee decided to accept 17 full papers instead of the usual 15-19 short papers and 3 system demonstrations The acceptance rate for full papers was 34% This year's meeting included a discussion as to the nature of the shape content and future of the event Representatives from different communities were invited to give their opinions and the organizing committee would like to warmly thank them here Such questions as the ongoing

viability of the symposium and the consequences of co-locating Smart Graphics with other larger research events led to interesting debates and have prepared the groundwork for what could be the future of the Smart Graphics conference series
