decision making resulting in higher demand from clients e.g. smart design, construction, operation and end of life (EOL). High requirements from stakeholders e.g. system efficiency, environmental performance, green procurement, fast-paced technological advancement and integration, natural disaster resilience of the built environment e.g. prediction, smart control of building component sustainability issues around the built environment. In this book, the interrelationships among the various lifecycle stages: design, construction, operation and EOL, the collective benefit of synergy at building level, multi-infrastructure level and city level as well as the ultimate goals in relation to the deployment of smart technologies in the industry are addressed. Part I covers smart design and construction, Part II smart living and operation and Part III broadens the scope to the whole smart city. Chapters examine how smart technologies can improve the effectiveness, productivity and efficiency of the built environment. An overview of theories and practices that are enabled by innovations and technologies for developing the SBE. The basis for new research agenda, new concepts and frameworks for future development. This handbook documents the current theories, practices and technologies and develops a holistic approach for research and practice by adopting a multidimensional outlook for the SBE. It is an essential reference work for all built environment stakeholders from academia through to the professions.

**Beyond Smart Cities** José A. Ondiviela, 2021-10-21. Cities are experiencing unprecedented times. In addition to managing the best possible post-pandemic recovery, cities are at the beginning of the 4th industrial revolution and all want to play a relevant role in it. To achieve this, they must retain and attract the necessary talent. There is a fierce competition where cities transform to become as attractive as possible. But what makes a city attractive from emotional and rational sides to talented citizens? For mayors and city directors, how can I prepare my city for this goal? What kind of transformations in the medium-long term should I develop? And in the short term, what processes and technologies SmartCity should I put in place? And from the point of view of citizens, how do I choose the best city to develop my full potential? Which one offers me the best citizenship contract? Where am I going to enjoy the best services with the highest quality of life and lower taxes/cost of life? In addition, the city must be attractive with a strong identity and dynamism and promising future. Can I find the cities that best suit my aesthetic and emotional preferences and that also offer me the services that I consider a priority at the lowest cost to my pocket? Find all the answers in this book.
