Smart Ports Weijian Mi, Yuan Liu, 2022-03-12 This book demonstrates the concept of ecological system of the smart ports. The innovation is emphasized as the essence of the ecological system as well as the prerequisite and foundation of sustainable development of smart ports. The main supporting technologies of smart ports including cyber physical system, middle office system, blockchain, artificial intelligence, machine vision, AR, VR, system simulation and emulation, digital monitoring and diagnosis etc are introduced with concepts and development descriptions as well as practical application cases. It could be used as demonstration and reference for the administrative staff, engineers and technicians as well as researchers in construction and operation of smart ports. [Routledge Handbook of Smart Built Environment](#) Weisheng Lu, Chimay J. Anumba, 2025-03-20 The primary aim of this edited volume is to document the current theories, best practices and technological advancements in the move towards a Smart Built Environment (SBE). The needs to accelerate towards the SBE are numerous and include: Increasing complexities and the need for interconnectivity within the built environment e.g. mega infrastructure projects; Data driven decision making resulting in higher demand from clients e.g. smart design; construction operation and end of life (EOL); High requirements from stakeholders e.g. system efficiency, environmental performance, green procurement; Fast paced technological advancement and integration; Natural disaster resilience of the built environment e.g. prediction, smart control of building component; Sustainability issues around the built environment. In this book the interrelationships among the various lifecycle stages: design, construction, operation and EOL, the collective benefit of synergy at building level, multi infrastructure level and city level as well as the ultimate goals in relation to the deployment of smart technologies in the industry are addressed. Part I covers smart design and construction; Part II smart living and operation; and Part III broadens the scope to the whole smart city. Chapters examine: How smart technologies can improve the effectiveness, productivity and efficiency of the built environment; An overview of theories and practices that are enabled by innovations and technologies for developing the SBE; The basis for new research agenda, new concepts and frameworks for future development. This handbook documents the current theories, practices and technologies and develops a holistic approach for research and practice by adopting a multidimensional outlook for the SBE. It is an essential reference work for all built environment stakeholders from academia through to the professions. **Introduction To Intelligent High-speed Railways** Tongjun Wang, 2024-11-25 In an era where digitalization and intelligence are the driving forces behind railway innovation, *Introduction to Intelligent High Speed Railways* introduces a model and data driven approach to high speed rail (HSR) management, combining innovative technology, data architecture and standard architecture. It presents an intelligent HSR architecture revolutionizing railway construction and operation. This book offers a comprehensive overview of China's Intelligent HSR architecture, management methods and remarkable achievements. It showcases pioneering research from China State Railway Group Co Ltd, highlighting their remarkable achievements in designing and
