Multisensory Landscapes Lara Koegst, Olaf Kühne, Dennis Edler, 2023-06-21 This book provides a broad view on multisensory landscapes from multiple perspectives It includes theoretical perspectives as well as case studies Different theoretical perspectives on landscape emerging from research in the last decades also require a differentiated approach to landscape phenomena going beyond the visual For example a social constructivist approach to the social world foregrounds the processes of negotiating social realities This is not limited to visual aspects and is not based on a clear physical measurability with an accompanying purely quantitative recording A phenomenological approach for example places the synesthetic experience of landscape at the core of interest This approach to the topic of multisensory via landscape is obvious for several reasons Firstly landscape is created from a constructivist perspective through the synthesis of sensory impressions on the basis of social patterns of interpretation and evaluation Secondly communication about landscape is also accessible to people who do not have any expertlike special knowledge in this regard Thirdly landscape as a changing concept is not only a concept of landscape but also of landscape itself Fourthly landscape as a changeable concept is particularly suitable for conceptually framing the highly fleeting non visual stimuli
