don't just learn the model you understand how to apply the model across your organization And then finally this is also a preparation for the Foundation exam We'll talk a little bit more about what the exam consists of here So what I'd like for you to do is prepare yourself for the exam and I really want you to understand what this ITIL stuff is all about Number one like I mentioned before the service life cycle You'll hear me talk about things like service strategy service design service transition service operation and continual service improvement Now that may be foreign to you today but as soon as you walk through several of these those will start to make a lot of sense to you We will talk about those life cycle phases We'll talk about capabilities and resources organizations should have to help drive services and drive them through their life cycles We'll talk a little bit about quality quality of processes and quality of services and so on So those are the topics that we're going to cover in this Book
