Handbook of Research on Project Management Strategies and Tools for Organizational Success

Moreno-Monsalve, Nelson Antonio, Diez-Silva, H. Mauricio, Diaz-Piraquive, Flor Nancy, Perez-Uribe, Rafael Ignacio, 2020-01-17

Project management tools can be used as an alternative to improve and strengthen a company's position in the market. However, the management of projects has been in constant transformation. Elements such as time, cost, and scope on which it is based have been complemented with other trends such as the project team, change management, knowledge management, good negotiation practices, management of stakeholders, sustainability, etc. In order to improve the competitiveness of their company and increase earned value, managers must remain up to date on these latest transformations and best practices. The Handbook of Research on Project Management Strategies and Tools for Organizational Success is a pivotal reference source that analyzes and disseminates new trends that will allow managers to improve their skills and strengthen the performance of their companies through obtaining better results in the projects undertaken. While highlighting topics such as market growth, risk management, and value creation, this book is ideally designed for project managers, managers, business professionals, entrepreneurs, academicians, researchers, and students seeking current research on improving the competitiveness of companies as well as increasing their earned value.

Radical Cindi Strauss, 2020-02-25 This essential survey of Italian Radical design, a movement that interrogated modern living against the turbulent political climate of the 1960s, is lavishly illustrated with new photography including rarely seen prototypes and limited production pieces.

Sustainability in Higher Education Federico Rotondo, Lucia Giovanelli, Rodrigo Lozano, 2024-04-30 This contributed volume addresses the issue of how higher education institutions can systematically reorient themselves to help society become more sustainable. In particular, a strategic management approach is used to overcome the fragmentation of sustainability initiatives increasingly conducted by higher education institutions worldwide. In this book, eminent scholars in the field of sustainability in higher education combine their different backgrounds to propose conceptual frameworks for interpreting and measuring sustainability integration in higher education institutions. The chapters contained herein explore which processes and management tools should be used as well as the challenges to be faced to make sustainable innovation effective. The cases present in this volume offer a guide for higher education institution management to lead the sustainability transition.

Responsibility in Small Things Monde Ndandani, 2020-08-24 Aspiring to be upright and honourable, this book is about metaphorical bricks, small things that make walls of all types of buildings within which people work and live. The figurative walls in the pages of this book are the Noah social types of the holy Bible. Behaviour is the function of character. A well-behaved person, young and old, develops to be a paragon of virtue, a rare species amongst the peoples of this world. Universal and generic good behavior project starts with casual greeting of one's family members in the morning and after intervals of absence from one's home. Greeting people anywhere should be spontaneous. Children learn being courteous from

their homes same as telling the truth all the time giving lies no space Hence building average good and steadfast citizenry is the responsibility of each homestead and family If being sturdy is the essential feature of leadership then every citizen in any country in the world can have her his turn to lead *Mud to bricks: A review of school infrastructure spending and delivery* Carmen Abdoll, Conrad Barberton, 2014-07-04 The Centre for Child Law commissioned this study by Cornerstone Economic Research to track school infrastructure spending and delivery The report written by Carmen Abdoll and Conrad Barberton makes the concerning finding that the national Department of Basic Education has woefully underspent the School Infrastructure Backlog grant for two years running In 2011 2012 spending was a little over 10 per cent and only at 23 per cent in 2012 2013 at the end of the third quarter The ASIDI target for the number of schools to be built in 2011 2012 and 2012 2013 was 49 However only 10 had been completed by the end of the first year They predict that if the DBE continues at the same delivery rate a realistic timeframe for the eradication of schools with inappropriate structures is probably 2023 24 They make recommendations which if followed could shorten the delay significantly This study shows the importance of monitoring and evaluating progress against court orders and out of court settlements to ensure that the right to a basic education is made real **Service Learning, Educational Innovation and Social Transformation** Bibiana
