Vila, 2014-10-23 This volume examines the varied

ways in which the senses were perceived afresh during the Enlightenment. In addition to introducing new philosophical and scientific models which sometimes upended the classic hierarchy of the senses, this period witnessed major changes in living and working habits including urbanization, travel and exploration, the invention of new sonic and visual media, and the rise of comfort and pleasure as values that cut across a range of social classes. As this volume shows, those developments inspired a wealth of sensorially stimulating styles of design, art, music, poetry, foodstuffs, material goods, and modes of worship and entertainment. The volume also demonstrates the period's countervailing concern with managing the senses, evident in fields like natural philosophy, medicine, education, religion, and public hygiene. Finally, it explores some of the Enlightenment's desensualizing tendencies like the separation of sensuous body from discerning mind in certain arenas of science and manufacturing, and the late 18th century shift away from a politics of publicity or intense visual and aural scrutiny toward the secret ballot.

A Cultural History of the Senses in the Age of Enlightenment presents essays on the following topics: the social life of the senses, urban sensations, the senses in the marketplace, the senses in religion, the senses in philosophy and science, medicine, and the senses in literature, art, and the senses and sensory media.

Enlightenment against Empire
Sankar Muthu, 2009-01-10
Inspired by a more multifaceted view of the Enlightenment, Muthu looks at a forgotten legacy from this period: its anti-imperialism. Gregory Jusdanis, *Research in African Literatures*. In the late eighteenth century, an array of European political thinkers attacked the very foundations of imperialism, arguing passionately that empire building was not only unworkable, costly, and dangerous, but manifestly unjust. *Enlightenment Against Empire* is the first book devoted to the anti-imperialist political philosophies of an age often regarded as affirming imperial ambitions. Sankar Muthu argues that thinkers such as Denis Diderot, Immanuel Kant, and Johann Gottfried Herder developed an understanding of humans as inherently cultural agents and therefore necessarily diverse. These thinkers rejected the conception of a culture-free natural man. They held that moral judgments of superiority or inferiority could be made neither about entire peoples nor about many distinctive cultural institutions and practices. Muthu shows how such arguments enabled the era's anti-imperialists to defend the freedom of non-European peoples to order their own societies. In contrast to those who praise the Enlightenment as the triumph of a universal morality, and critics who view it as an imperializing ideology that denigrated cultural pluralism, Muthu argues instead that eighteenth-century political thought included multiple Enlightenments. He reveals a distinctive and underappreciated strand of Enlightenment thinking that interweaves commitments to universal moral principles and incommensurable ways of life, and that links the concept of a shared human nature with the idea that humans are fundamentally diverse. Such an intellectual temperament, Muthu contends, can broaden our own perspectives about international justice and the relationship between human unity and diversity.

Teachers and the Epistemology of History
Henrik Åström Elmersjö, Paul Zanzanian, 2024-06-25
This edited book explores conceptual as well as empirical approaches to epistemic beliefs that teachers of history might hold. In many parts of the world, history teachers are tasked with both

upholding historical national myths and at the same time giving students the tools needed to deconstruct history and think critically This ambiguity embedded in the combination of reconstruction and deconstruction is a difficult landscape for teachers to navigate The chapters of this book therefore explore how teachers reason regarding the epistemic nature of history and how this impacts their teaching interpretation of curricula and relationship to their students Contributions consider the implications for prospective history teachers and in service training challenges to the field and point to ways forward The book will be of interest to academics and students of history education as well as practising teachers and museum curators This is an open access book
