

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health-related quality of life (HRQL) of sedentary, middle-aged women. The study was a randomized controlled trial. The intervention group (IG) participated in a 12-week training program, while the control group (CG) remained sedentary. The IG showed significant improvements in physical fitness and HRQL compared to the CG. The results suggest that a 12-week training program can improve physical fitness and HRQL in sedentary, middle-aged women.

Examining Information Literacy in Academic Libraries Chizwina, Sabelo, Moyo, Mathew, 2024-04-09 In the 21st century information literacy emerges as the cornerstone of educational development. Despite its paramount significance, a stark reality persists: students often traverse the corridors of academia without acquiring essential information literacy skills. This deficiency is exacerbated by a shortage of faculty training, leaving academic libraries to shoulder the responsibility of cultivating information-savvy individuals. *Examining Information Literacy in Academic Libraries* delves into the core challenges and solutions surrounding this critical educational imperative. This book illuminates the role of academic libraries as bastions of information literacy instruction. The capacity of students and information consumers to seek, evaluate, and utilize information is paramount for informed decision-making, ethically and legally. Regardless of whether or not students were brought up in the digital age, many lack the fundamental information literacy skills required for higher education. This deficiency manifests in academic malpractices such as plagiarism, which compromise the integrity of educational institutions. Moreover, this imperative work contends that the Fourth Industrial Revolution (4IR) is not a distant concept but a present reality. The recent global upheaval caused by the Coronavirus pandemic accelerated the adoption of new technologies, necessitating a swift reassessment of our collective ability to navigate this ever-changing digital and information landscape. Focusing on media literacy, data literacy, and digital literacy with information literacy as the overarching domain, this book serves as a beacon for educators, librarians, and policymakers.

Veterinary Medical School Admission Requirements (VMSAR) Association of American Veterinary Medical Colleges, 2015-04 Fully up to date and packed with useful tips and helpful insights, this publication provides a comprehensive overview of the admission process for the national and international veterinary schools that are members of the Association of American Veterinary Medical Colleges (AAVMC). As the official guide to getting into vet school, it provides hundreds of pages of must-have information essential to achieving your goal of becoming a veterinarian. The heart of the book is a directory of member schools providing for each one the following information: a summary of application procedures, requirements for application and residency, prerequisites for admission, deadlines for each component of the application process, description of campus and campus life, and cost of tuition and fees. Full-page spreads provide a complete profile of the different campuses and clearly lay out all the details you need to select the school that matches your needs best. Additional information includes an overview of the Veterinary Medical College Application Service (VMCAS), information about the accreditation of veterinary schools and professional licensure as a veterinarian, a helpful timeline for aspiring vets from high school onward, and firsthand accounts from current students and practitioners about what it's like to train as a vet. The book provides the best concise, current, and comparative information for those students interested in preparing for a career in veterinary medicine, as well as their advisors and counselors. It is the essential guide to becoming a DVM. As Executive Director of AAVMC, Dr. Andrew McCabe writes: "These are exciting times for

Where Nation-States Come From Philip G. Roeder, 2012-01-09 To date the world can lay claim to little more than 190 sovereign independent entities recognized as nation states while by some estimates there may be up to eight hundred more nation state projects underway and seven to eight thousand potential projects Why do a few such endeavors come to fruition while most fail Standard explanations have pointed to national awakenings nationalist mobilizations economic efficiency military prowess or intervention by the great powers Where Nation States Come From provides a compelling alternative account one that incorporates an in depth examination of the Russian Empire the Soviet Union and their successor states Philip Roeder argues that almost all successful nation state projects have been associated with a particular political institution prior to independence the segment state a jurisdiction defined by both human and territorial boundaries Independence represents an administrative upgrade of a segment state Before independence segmental institutions shape politics on the periphery of an existing sovereign state Leaders of segment states are thus better positioned than other proponents of nation state endeavors to forge locally hegemonic national identities Before independence segmental institutions also shape the politics between the periphery and center of existing states Leaders of segment states are hence also more able to challenge the status quo and to induce the leaders of the existing state to concede independence Roeder clarifies the mechanisms that link such institutions to outcomes and demonstrates that these relationships have prevailed around the world through most of the age of nationalism
