

Culture of Learning: Create a classroom culture where student agency, mathematical identity, and belonging contribute to students' mathematical success.			
- Students and their teacher demonstrate a joy for learning through positive relationships and strong classroom culture that is responsive to student interests, experiences, and approaches to learning. - Students demonstrate self-management and there is a classroom culture of student choice and autonomy. - Students demonstrate positive dispositions and beliefs about their ability to participate and perform effectively in mathematics and their ability to use mathematics as a problem-solving tool in powerful ways across the contexts of their lives. - Students are engaged in the mathematics of the lesson from start to finish; there is intentionality about how time is used.	Yes No		
Core Action One: Focus, Coherence, and Rigor at the Center of Instruction			
A. A majority of the lesson is spent on the grade/course-level cluster(s), grade/course-level content standard(s), or part(s) thereof. Mathematical Learning Goal: Standard(s) addressed in this lesson:	Yes No		
B. The curriculum materials are used as designed to connect developing mathematical ideas to math content within or across grades/courses through the use of tasks, examples, multiple representations, discussion, and instructional techniques.	Yes No		
C. The curriculum materials are used as designed to intentionally target the aspect(s) of Rigor (conceptual understanding, procedural skill and fluency, application) called for by the standard(s) being addressed in the lesson. Which aspect(s) of Rigor are targeted in the standard(s) addressed in the lesson? Which aspect(s) of Rigor are targeted in the instruction?	Yes No		
Core Action One Summary: The majority of the mathematics content of the lesson is grounded in materials and the delivery of the lesson meets the intent of grade-level standard(s) and leverages mathematical coherence and the appropriate aspect(s) of rigor to develop student understanding.			
Core Action Two: Teacher Strategies to Develop Math Meaning			
A. The teacher uses a variety of explanations, representations, tasks, examples and/or instructional techniques are used to make the mathematics of the lesson explicit.	Yes Somewhat	Mostly Not Yet	
B. The teacher shares multiple students' representations and/or solution methods and connects to students' understanding of the content, reduces student misconceptions, and ensures the mathematics is explicit.	Yes Somewhat	Mostly Not Yet	
C. The teacher provides feedback and adjusts the lesson in response to student understanding. Questions and tasks surface misconceptions and opportunities for growth.	Yes Somewhat	Mostly Not Yet	
D. The teachers uses internal summaries to pause and ensure understanding making references to student work and using discussions and questions reinforce the concepts of the lesson.	Yes Somewhat	Mostly Not Yet	
Core Action Two Summary: The teacher uses instructional strategies to ensure all students progress toward mastery of the mathematical concepts addressed in the lesson.	Yes Somewhat	Mostly Not Yet	
Core Action Three: Provide all students with opportunities to do mathematical thinking within the lesson. <i>Some or most of the indicators and student behaviors should be observable in every lesson, though not all will be evident in every lesson.</i>			
A. The teacher provides opportunities and access for all students to work with and practice grade-level problems and exercises. Students work with and practice grade-level problems and exercises.	Yes Somewhat	Mostly Not Yet	
B. The teacher cultivates reasoning and problem solving by supporting students productive struggle. Students reason, make sense of mathematics, and persevere in solving problems in the face of difficulty.	Yes Somewhat	Mostly Not Yet	
C. The teacher poses questions and problems that prompt students to explain their thinking in a variety of ways about the content of the lesson. Students share their thinking in a variety of ways about the content of the lesson beyond just stating answers.	Yes Somewhat	Mostly Not Yet	
D. The teacher provides opportunities for student conversations where students talk about each other's thinking. Students discuss and ask questions about each other's thinking, in order to clarify or improve their own mathematical understanding, justifications, and explanations.	Yes Somewhat	Mostly Not Yet	
E. The teacher connects and develops students' informal and/or home language and mathematical ideas to precise mathematical language and ideas. Students use increasingly precise mathematical language and ideas as they reason and explain their thinking.	Yes Somewhat	Mostly Not Yet	
Core Action Three Summary: Students do and share their mathematical thinking within the lesson to develop a deeper understanding of the mathematical concepts addressed in the lesson.	Yes Somewhat	Mostly Not Yet

all activities that The Center for Educational Leadership is involved in around the state of Tennessee and the United States. This includes all school leadership summits for policy makers, practitioners, scholars, and legislators. It represents the shared vision and commitment of educational leaders, politicians, educational reformers, and legislators. This book will be distributed to school leaders, professional development coaches, teacher unions, scholars at several Tennessee institutions of higher education, and members of the Tennessee legislature and Department of Education. The audience for this series is primarily school leaders and scholars who are launching and designing new programs or revising and strengthening existing programs. However, those who are discussing policy at the local, state, and national level would be interested in the information given within these pages as it relates clearly to their work in educational leadership.

Research in Education, 1974 Title List of Documents Made Publicly Available, 1987 Prevention Science in School Settings Kris Bosworth, 2015-11-24

This straightforward volume makes a strong practical research-based case for integrating prevention programs into middle and high schools. Written by experts in prevention science and education, it examines educational goals and prevention of risky behaviors as parallel and complementary processes and provides evidence for health-promoting schools as a critical forum for student development. Chapters show the benefits of this collaboration as instructors engage with prevention content, prevention scientists study schools and create interventions, and counselors develop and implement activities resulting in improved academic, social, and health outcomes. Examples of successful prevention strategies address personal and public health issues as varied as substance abuse, dating violence, dropping out, and suicide. Among the topics covered: Engaging school leaders in prevention; Developing school-based prevention curricula; Scaling up evidence-based prevention interventions and practices; Conducting prevention research and evaluation in schools; Promoting a positive school climate and culture; Reducing disruptive behavior, violence, and bullying. Child and school psychologists, administrators, teachers, school counselors, and prevention specialists will find significant common ground in *Prevention Science in School Settings*. The breadth and depth of coverage point to new multidisciplinary directions in health education, school climate, culture, and positive youth development.

On the Rocketship Richard Whitmire, 2014-05-15

The face of American education is evolving, and the roadmap is clear. *On the Rocketship: How Top Charter Schools are Pushing the Envelope* examines the rise and expansion of leading charter school networks, revealing the secret sauce that makes a successful program. A strong narrative with a timely message, the book explores how Rocketship started and the difficulties encountered as it expands. Designing schools for children who have been failed by traditional schools is extremely challenging work. Setbacks are inevitable. Later in the book, the narrative shifts to the national picture, exploring how high-performing charter schools are changing the education landscape in cities such as Denver, Memphis, and Houston. The book emerges just as charter schools are running into stiff political opposition in New York City and elsewhere. Even in San Jose, Rocketship's home base, the pushback against charter schools is gaining speed. *On the Rocketship* becomes a valuable resource for explaining what's at

stake in this battle Lose these schools in New York San Jose and other cities and low income and minority students lose their best shot at a quality education Written by a veteran journalist who followed Rocketship through a school year the book explores some of the factors that make Rocketship and other charters successful including the blended learning that was pioneered at charter schools especially Rocketship Many schools around the country are looking to Rocketship as a model for implementing blended learning The interplay between charter schools and blended learning is setting a change in motion and the American education system is ready to evolve On the Rocketship details this phenomenon providing insights for educators across the nation *A Guide to Undergraduate Science Course and Laboratory Improvements* National Science Foundation (U.S.). Directorate for Science Education,1979 *Resources in Education* ,1992 **Short Cycle Assessment** Susan Lang,2013-09-27 This book shows you how to improve student achievement by providing them with frequent feedback on their work It provides a step by step process to help you write good questions that asses student learning design your own formative assessments administer short cycle assessments analyze and use data to shape instruction prepare your students for high stakes tests and includes activities and forms to walk you through the process step by step **School Turnaround in Secondary Schools** Coby V. Meyers,Marlene J. Darwin,2019-12-01 In the continuing quest to turnaround the lowest performing schools rapid and sustainable reform or school turnaround seems most elusive for secondary schools Secondary schools are rife with challenges due to their wide ranging mission and organizational complexity With the continued emphasis on college and career readiness and the vast learning possibilities enhanced by technology our third book in this series Contemporary Perspectives on School Turnaround and Reform focuses on rapid school turnaround and reform in secondary schools In this edited volume researchers and scholars consider the doubly perplexing challenge of school turnaround or the rapid improvement of the lowest performing secondary schools Although there is some evidence that school turnaround policy can impact student achievement scores research across international contexts seldom identifies schools that substantially changed student learning trajectories and sustained them Separately many societies have found improving secondary schools a relatively intractable problem for multiple reasons including school size and complexity the micropolitics of teaching and leading within them and cumulative widening student achievement gaps In combination there are almost no examples of low performing secondary schools turning around The chapters in this book begin to offer some hope about how policymakers practitioners and researchers might begin to reconceptualize how they engage in and undertake the work of rapidly improving low performing secondary schools The authors provide theoretical and conceptual advancements offer lessons learned from both successful and unsuccessful initiatives and address practical issues with potentially accessible ways forward *Curriculum Renewal* Rebecca Crawford Burns,Association for Supervision and Curriculum Development,2001 *Analyzing and Interpreting Qualitative Research* Charles Vanover,Paul Mihas,Johnny Saldana,2021-04-14 This text provides comprehensive coverage of the key methods for analyzing interpreting and writing up

qualitative research in a single volume and drawing on the expertise of major names in the field Covering all the steps in the process of analyzing interpreting and presenting findings in qualitative research the authors utilize a consistent chapter structure that provides novice and seasoned researchers with pragmatic how to strategies Each chapter introduces the method uses one of the authors own research projects as a case study of the method described shows how the specific analytic method can be used in other types of studies and concludes with questions and activities to prompt class discussion or personal study
