Roy Nash, 2012 In the field of teacher expectations and pupil learning one important psychological truth is that the pupils achievement in learning is strongly influenced by the teachers expectations of their level of performance high or low Roy Nash discusses critically and fully important research in this area In the belief that research must be interpreted within an overall theory of social action the author relates the empirical studies which he examines to an interactionist theory He emphasizes the importance of making teachers aware of the implications of what they are doing and of the possibility of establishing wider and more educative patterns of interaction He shows that research into attitudes perceptions or expectations is all essentially concerned with the same problem how teachers relate to pupils on the basis of a model of what pupils may be Much of the work he discusses has direct relevance to teachers in their day to day work The research findings will help them to become more aware of their attitudes and how these influence their actions and should make them more likely to give all their pupils equal opportunities within their classes Among the topics covered are observational and experimental studies of teacher expectations the analysis of classroom climate self conceptions pupils perceptions and expectations and the significance of classroom based research into teacher pupil interaction *Goal-Driven Lesson Planning for Teaching English to Speakers of Other Languages* Christina Michaud, Marnie Reed, 2010-07-29 This book is more than a collection of activities or ready made lesson plans to add to a teaching repertoire Instead Goal Driven Lesson Planning is intended to empower teachers and help them create a principled framework for their teaching a framework that will shape the varied activities of the ESL classroom into a coherent teaching and learning partnership After reading this book teachers and prospective teachers will be able to articulate their individual teaching philosophies Goal Driven Lesson Planning shows readers how to take any piece from English language materials an assigned text a random newspaper article an ESL activity from a website etc and use it to teach students something about language Readers are walked through the process of reflecting on their role in diagnosing what that something is what students really need and planning how to get them there and how to know when they got there in a goal driven principled manner This book has chapters on the theory of setting specific language goals for students how to analyze learner needs including an initial diagnostic and needs analysis templates to use when planning goal driven English language lessons explicit instruction on giving corrective feedback how to recognize and assess student progress and the mechanics and logistics that facilitate the goal driven language classroom
