Yearbook of International Law 2016 Martin Kuijer, Wouter Werner, 2017-12-13 International law holds a paradoxical position with territory. Most rules of international law are traditionally based on the notion of State territory and territoriality, which still significantly shapes our contemporary legal system. At the same time, new developments have challenged territory as the main organising principle in international relations. Three trends in particular have affected the role of territoriality in international law: the move towards functional regimes, the rise of cosmopolitan projects claiming to transgress state boundaries, and the development of technologies resulting in the need to address intangible, non-territorial phenomena. Yet, notwithstanding some profound changes, it remains impossible to think of international law without a territorial locus. If international law is undergoing changes, this implies a reconfiguration of territory, but not a move beyond it.

The Netherlands Yearbook of International Law was first published in 1970. It offers a forum for the publication of scholarly articles of a conceptual nature in a varying thematic area of public international law. *International Law and Weapons Review* Natalia Jevglevskaja, 2021-12-16 The first comprehensive and systemic analysis of States' weapons review obligation under international law, underpinned by empirical research.
