Description

Articulated Hauler A30C is equipped with engine type TD 103 KBE.

The engine is a straight six-cylinder, direct-injected turbocharged, low emission – high performance diesel engine with intercooler.

The engine type, product and serial numbers are stamped on both right and left sides of the cylinder block. The cylinder heads, one for each cylinder, are interchangeable. The cylinder heads have replaceable valve seats and valve guides for both inlet and exhaust valves.

The valve mechanism is operated by the cam shaft via push rods and rocker arms.

The fuel injection pump is equipped with a smoke limiter for torque limitation of the engine. The injectors are mounted in replaceable copper sleeves that are pressed into the cylinder head and directly cooled by the coolant.

Refer to the special Service Manual listed in the "Preface" for repair work to the engine.
