Risk Management of Less Lethal Options R.T. Wyant, Thomas Burns, 2014-04-28 Force used to quell out of control demonstrations or detain unruly individuals can result in litigation and bad press for law enforcement agencies Injury or loss of life can best be avoided if agencies have accurate knowledge and proper training in less lethal options *Risk Management of Less Lethal Options Evaluation Deployment Aftermath and* **Taser Electronic Control Devices and Sudden In-custody Death** Howard E. Williams, 2008 Negative sentiment regarding conducted energy weapons is due largely to a lack of understanding about the technology behind such weapons and a misunderstanding of those weaponsOCO physiological effects Media accounts that speculatively associate sudden in custody deaths with the use of conducted energy weapons only add to the confusion **TASER ELECTRONIC CONTROL DEVICES AND SUDDEN IN CUSTODY DEATH** documents 310 deaths in the United States proximate to the application of TASER electronic control devices from 1983 through 2006 The study examines the phenomenon of sudden death as it relates to electromuscular disruption technology and TASER electronic control devices by constructing 213 cases studies dating from 1983 through 2005 and analyzing information available from news accounts police reports and autopsies After reviewing the available evidence from this extensive case study the author concludes that these conducted energy weapons are excluded as the cause of death in 182 of the 212 cases In only two cases did the evidence tend to confirm the weapon was either a cause of death or a significant contributing factor While arguing that the TASER electronic control devices are safe less lethal weapons the author also cautions that they are not completely effective He notes that the weapons were not effective in subduing more than 60 percent of violent or aggressive subjects in the 213 case studies and he documents 131 cases of fatal police shootings and one police fatality following the failure of the weapons The only way to determine whether the TASER electronic control devices is responsible for deaths is to separate evidence from conjecture and analyze the facts of each case This book will be an excellent resource for law enforcement professionals attorneys investigators and criminal justice personnel **Torture and Democracy** Darius Rejali, 2009-06-08 This is the most comprehensive and most comprehensively chilling study of modern torture yet written Darius Rejali one of the world s leading experts on torture takes the reader from the late nineteenth century to the aftermath of Abu Ghraib from slavery and the electric chair to electrotorture in American inner cities and from French and British colonial prison cells and the Spanish American War to the fields of Vietnam the wars of the Middle East and the new democracies of Latin America and Europe As Rejali traces the development and application of one torture technique after another in these settings he reaches startling conclusions As the twentieth century progressed he argues democracies not only tortured but set the international pace for torture Dictatorships may have tortured more and more indiscriminately but the United States Britain and France pioneered and exported techniques that have become the lingua franca of modern torture methods that leave no marks Under the watchful eyes of reporters and human rights activists

low level authorities in the world's oldest democracies were the first to learn that to scar a victim was to advertise iniquity and invite scandal Long before the CIA even existed police and soldiers turned instead to clean techniques such as torture by electricity ice water noise drugs and stress positions As democracy and human rights spread after World War II so too did these methods Rejali makes this troubling case in fluid arresting prose and on the basis of unprecedented research conducted in multiple languages and on several continents begun years before most of us had ever heard of Osama bin Laden or Abu Ghraib The author of a major study of Iranian torture Rejali also tackles the controversial question of whether torture really works answering the new apologists for torture point by point A brave and disturbing book this is the benchmark against which all future studies of modern torture will be measured *The RVer's Ultimate Survival Guide* , **Illinois**

Thin Blue Lie Matt Stroud,2019-03-19 A wide ranging investigation of how supposedly transformative technologies adopted by law enforcement have actually made policing worse lazier more reckless and more discriminatory American law enforcement is a system in crisis After explosive protests responding to police brutality and discrimination in Baltimore Ferguson and a long list of other cities the vexing question of how to reform the police and curb misconduct stokes tempers and fears on both the right and left In the midst of this fierce debate however most of us have taken for granted that innovative new technologies can only help During the early 90s in the wake of the infamous Rodney King beating police leaders began looking to corporations and new technologies for help In the decades since these technologies have in theory given police powerful previously unthinkable faculties the ability to incapacitate a suspect without firing a bullet Tasers the capacity to more efficiently assign officers to high crime areas using computers Compstat and with body cameras a means of defending against accusations of misconduct But in this vivid deeply reported book Matt Stroud shows that these tools are overhyped and in many cases ineffective Instead of wrestling with tough fundamental questions about their work police leaders have looked to technology as a silver bullet and stood by as corporate interests have insinuated themselves ever deeper into the public institution of law enforcement With a sweeping history of these changes Thin Blue Lie is a must read for anyone seeking to understand how policing became what it is today

Twelve Inventions Which Changed America Gerhard Falk,2013-02-13 This book describes twelve inventions that transformed the United States from a rural and small town community to an industrial country of unprecedented power These inventions demonstrate that no one person is ever responsible for technological advances and that the culture produces a number of people who work together to create each new invention The book also shows the influences of technology on society and examines the beliefs and attitudes of those who partake in technological advances The book is both a sociological analysis and a history of technology in the United States in the past two hundred years

National Labor Relations Board, 2015-08 *Shooting to Kill* Simon Bronitt, Miriam Gani, Saskia Hufnagel, 2012-11-05 The present book brings together perspectives from different disciplinary fields to examine the significant legal moral and political issues which arise in relation to the use of lethal force in both domestic and international law These issues have particular salience in the counter terrorism context following 9 11 which brought with it the spectre of shooting down hijacked airplanes and the use of force in Operation Kratos that led to the tragic shooting of Jean Charles de Menezes Concerns about the use of excessive force however are not confined to the terrorist situation The essays in this collection examine how the state sanctions the use of lethal force in varied ways through the doctrines of public and private self defence and the development of legislation and case law that excuses or justifies the use of lethal force in the course of executing an arrest preventing crime or disorder or protecting private property An important theme is how the domestic and international legal orders intersect and continually influence one another While legal approaches to the use of lethal force share common features the context within which force is deployed varies greatly Key issues explored in this volume are the extent to which domestic and international law authorise pre emptive use of force and how necessity and reasonableness are legally constructed in this context Lethal Force and New Zealand Police Richard S. Shortt, 2022-08-22 This book challenges the notion that the New Zealand Police are one of only four global police services that does not have routinely armed officers using arguments and facts drawn from 2000 to 2019 a period of important change for the organisation and its relationship with firearms particularly following the outrages of the Christchurch mosques terrorist massacres in 2019 and the 2020 shooting death of a young police constable in Aotearoa New Zealand This book provides a brief history of the Police from its beginnings to the present day with a specific focus on its relationship with firearms which contextualize the law that justifies use of lethal force in a country that has abolished the death penalty It examines police policies procedures training and structures governing deployment and use of firearms in Aotearoa New Zealand and the independent oversight that now applies to fatal and non fatal shootings by Police Using 43 publicly released oversight agency reports and data directly related to police shootings such as who is being shot this book investigates how the police are using lethal force who is being affected and what this might mean for the service with regards to the operational deployment of firearms and the potential for use of lethal force within the community into the future **Ending the War against Children: The Rights of Children to Live Free of Violence, An Issue of Pediatric Clinics of North America, E-Book** Bonita F. Slate, Jacqueline K. Buffington-Vollum, W. Wesley Johnson, 2013-10-03 For a myriad of reasons the criminal justice system has become the de facto mental health system This book explores how and why this is the case Sensationalized cases often drive criminal justice policies that can sometimes be impulsively enacted and misguided While there are chapters that examine competency insanity and inpatient and outpatient commitment the primary focus of the book is on the bulk of encounters that clog the criminal justice system with persons with mental illnesses pwmi Criminal justice practitioners are often ill equipped for dealing with pwmi in crises However via application of therapeutic jurisprudence principles some agencies are better preparing their employees for such encounters and attempting to stop the inhumane and costly recycling of pwmi through the criminal justice system Coverage runs the gamut from deinstitutionalization to specialized law enforcement responses to mental health courts to jails and prisons to discharge planning diversion and reentry Also criminal justice practitioners in their own words provide insight into and examples of the interface between the mental health and criminal justice systems Throughout the book the balance between maintaining public safety and preserving civil liberties is examined as the state s police power and parens patriae roles are considered Reasoned collaborative approaches for influencing and informing policies that are often driven by crises are discussed this book also reflects more psychological underpinnings than the 1st edition as one of the co authors new to this edition is a forensic clinical psychologist The following Teaching Materials are available electronically on a CD or via email Please contact Beth Hall at bhall@capress.com to request a copy and specify what format is needed Teacher s Manual with notes and extensive test bank in Word pdf formats Test bank is also available in separate files by chapter in Word and Blackboard formats Other LMS formats may be available let me know what you need Upon adoption only the following are also available 3 Videos Upon adoption only One video illustrates Crisis Intervention Team scenarios another explores PTSD and the third video is of a lecture author Risdon Slate gave to law enforcement in training that describes his own personal story PowerPoint slides will be available upon adoption Email bhall@capress.com for more information I am so grateful that I have decided on this book and the resources are amazing Joseph C Marinello lecturer in the Department of Criminal Justice and Criminology UNC Charlotte on classroom adoption of second edition Notorious criminal cases tend to drive public opinion and policy when it comes to how our criminal justice system deals with persons with mental illnesses Drs Slate and Johnson s book is a far brighter star to steer by By most accounts including the US Department of Justice our criminal justice system is
