VOLVO OWNER'S MANUAL S60

pg. 1 Introduction

Welcome to the worldwide family of Volvo owners. We hope that you will enjoy many years of safe driving in your Volvo, an automobile designed with your safety and comfort in mind. To help ensure your satisfaction with this vehicle, we encourage you to familiarize yourself with the equipment descriptions, operating instructions and maintenance requirements/recommendations in this manual. We also urge you and your passengers to wear seat belts at all times in this (or any other) automobile. And, of course, please do not operate a vehicle if you may be affected by alcohol, medication or any impairment that could hinder your ability to drive.

Your Volvo is designed to meet all applicable safety and emission standards, as evidenced by the certification labels attached to the driver's door opening and on the left wheel housing in the engine compartment.

Environmental Information in Instructions for Use of Consumer Products Ari Nissinen, 2005-03-11 The European Union has highlighted the issue of environmentally sound use of products in the context of Integrated Product Policy IPP Accordingly consumers should have easy access to understandable relevant and credible environmental information Information about product characteristics is available in different forms and sources but in many cases relevant environmental information is not available on the product itself The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information User manuals of passenger cars and refrigerators were focused on examining the advice which could diminish the harmful environmental effects of the use of these products Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products The study raised many ideas about actions that could promote the status and eco development of instructions for use **Gonzalez, Sr. V. measures that contribute to the implementation of Vision Zero in road traffic Examples of specific elements discussed are urban and rural road designs human factor designs and avoiding drunk and distracted driving The final part of the handbook offers perspectives on the transfer of Vision Zero policy to other areas ranging from air traffic to suicide prevention and nuclear energy Vision Zero is a public road safety policy including both a long term goal that no one shall be killed or seriously injured as a consequence of accidents in road traffic and a safety principle stating that the design and function of the road transport system shall be adapted to meet the requirements that follow from that goal It is a new road safety paradigm which has resulted in new types of responsibilities among stakeholders technological innovations and new strategies and organizational measures to achieve a safe system The road safety work based on Vision Zero has shown promising results and although Sweden has not yet reached a safe system the number of fatalities and severe injuries has decreased substantially This is an open access book Driver Training for Automated Vehicles Siobhán E.

Merriman, Katherine L. Plant, Kirsten M. A. Revell, Neville A. Stanton, 2024-04-30 Since the introduction of Automated Vehicles AVs on roads there have been a number of high profile collisions which have highlighted significant driver challenges These include challenges associated with drivers trust in the automation their knowledge and awareness of the AV s capabilities and limitations and their reduced situation awareness of the road environment and the vehicle Solutions are needed to overcome these challenges so that the expected benefits of AVs can be realised Driver Training for Automated Vehicles A Systems Approach identifies the training requirements for drivers of AVs and takes a systematic approach to design develop implement and evaluate a comprehensive training package to address these requirements This book explores how training can overcome the driver challenges associated with AVs by improving drivers mental models trust in automation decisions and behaviour when activating a Level 4 AV It presents a systematic approach to the training lifecycle by first presenting the current state of research into AVs identifying the challenges and training requirements for drivers of AVs and then developing and evaluating a training programme to achieve these requirements This fascinating title highlights the need for drivers to undergo training for AVs and takes us a step closer to this need It walks readers through a systematic four step process and provides practical guidance to develop and evaluate an effective training programme The reader will develop a thorough understanding of the current driver challenges with AVs and the methods and systems to mitigate them through current knowledge and research This book is an ideal read for practitioners designers and academics with a professional or research interest in AVs Its appeal extends to those in the fields of automotive design Systems Engineering Human Factors and education and training **User Experience Design in the Era of Automated Driving** Andreas Riener, Myounghoon Jeon, Ignacio Alvarez, 2022-01-01 This book is dedicated to user experience design for automated driving to address humane aspects of automated driving e g workload safety trust ethics and acceptance Automated driving has experienced a major development boost in recent years However most of the research and implementation has been technology driven rather than

human centered The levels of automated driving have been poorly defined and inconsistently used A variety of application scenarios and restrictions has been ambiguous Also it deals with human factors design practices and methods as well as applications such as multimodal infotainment virtual reality augmented reality and interactions in and outside users This book aims at 1 providing engineers designers and practitioners with a broad overview of the state of the art user experience research in automated driving to speed up the implementation of automated vehicles and 2 helping researchers and students benefit from various perspectives and approaches to generate new research ideas and conduct more integrated research
