**Economics and World History** Paul Bairoch, 1995-09 Paul Bairoch deflates twenty commonly held myths about economic history Among these myths are that free trade and population growth have historically led to periods of economic growth and that colonial powers in the nineteenth and early twentieth centuries became rich through the exploitation of the

Third World Bairoch shows that these beliefs are based on insufficient knowledge and wrong interpretations of the history of economies of the United States Europe and the Third World and he re examines the facts to set the record straight Bairoch argues that until the early 1960s the history of international trade of the developed countries was almost entirely one of protectionism rather than a Golden Era of free trade and he reveals that in fact past periods of economic growth in the Western World correlated strongly with protectionist policy He also demonstrates that developed countries did not exploit the Third World for raw materials during the nineteenth and early twentieth centuries as some economists and many politicians have held Among the many other myths that Bairoch debunks are beliefs about whether colonization triggered the Industrial Revolution the effects of the economic development of the West on the Third World and beliefs about the 1929 crash and the Great Depression Bairoch s lucid prose makes the book equally accessible to economists of every stripe as well as to historians political scientists and other social scientists *Catalogue of the Library of the Peabody Institute of the City of Baltimore* ,1883 *Encounters Old and New in World History* Alan Karras,Laura J. Mitchell,2017-06-30 This collection of essays asserts the specific value of world history research and teaching showing how the field contributes to the larger historical profession and offering concrete suggestions to develop more interaction between the academy and the public The twelve contributors each with their own academic areas of interest are experienced scholars and classroom teachers Uniting them together in this volume is their professional relationship with Jerry H Bentley 1949 2012 This shared connection served as a catalyst to showcase Bentley s enduring legacy a commitment to investigating large scale questions with detailed empirical evidence that explains the human condition documenting both patterns of similarity and difference in ways that account for regional and temporal variations The volume continues Bentley s meticulous attention to world historical methods focus on scale cross cultural encounter comparison periodization critical geography and interdisciplinarity *Encounters Old and New in World History* responds to provocations that Jerry Bentley tendered in his scholarship and through his professional activities Contributors interrogate the institutional settings disciplinary proclivities methodological choices and diverse source bases of world history research and teaching Several essays address the ways in which present day concerns influence research on local and global scales Other essays pay particular attention to the production and circulation of knowledge across regional temporal and class boundaries as well as between the academy and the wider public Claiming the centrality of globally informed and focused approaches to historical inquiry researchers continue the conversations that Bentley carried on through his own scholarship teaching editing of the *Journal of World History* participating in public forums and contributing to public discussions about the place of history in understanding today s global integration The stakes involved in asking questions about the shared history of humankind continue to increase in the current era of intensified globalization It is incumbent upon scholars with the skills to work across linguistic geographic temporal and disciplinary boundaries to show the ways that cross cultural encounters happened historically and to point out
