Testing Xun Yan,Slobodanka Dimova, April Ginther,2023-07-18 This book describes language testing practices that exist in
the intermediate space between large scale standardized testing and classroom assessment an area that is rarely addressed
in language testing literature Drawing empirical research on a variety of languages the volume discusses local language tests
ability to represent local contexts and values explicitly and purposefully embed test results within instructional practice and
provide data for program evaluation and research Although local testing practices have been grounded in the theoretical
principles of language testing the authors in this volume supplement the theoretical content with practical examples of how
local tests can be designed to effectively function within and across different institutional contexts *Suzuki RM125*
