Vélez,Norma P. Puente,Dora-Luz Flores,Adriano O. Andrade,Héctor A. Galván,Fabiola Martínez,Renato García,Citlalli J. Trujillo,Aldo R. Mejía,2019-09-30 This book gathers

the joint proceedings of the VIII Latin American Conference on Biomedical Engineering CLAIB 2019 and the XLII National Conference on Biomedical Engineering CNIB 2019 It reports on the latest findings and technological outcomes in the biomedical engineering field Topics include biomedical signal and image processing biosensors bioinstrumentation and micro nanotechnologies biomaterials and tissue engineering Advances in biomechanics biorobotics neurorehabilitation medical physics and clinical engineering are also discussed A special emphasis is given to practice oriented research and to the implementation of new technologies in clinical settings The book provides academics and professionals with extensive knowledge on and a timely snapshot of cutting edge research and developments in the field of biomedical engineering

Biosystems Engineering Applications for Quality Food Production Romeo Rojas,Guillermo Cristian Guadalupe Martínez-Ávila,Nancy del Pilar Medina Herrera,2024-12-13 Biosystems engineering as an integrated science combines the fields of engineering design and analysis with biological sciences to provide solutions for food production and processing problems Since food production is an ever growing constantly changing food engineering frontier it is faced with a range of dynamic problems This new book Biosystems Engineering Applications for Quality Food Production Waste Valorization and New Product Development shows how the two areas of biosystems engineering and food industry come together in an interdisciplinary way to offer solutions to these problems The book presents the most recent advances in these two areas ranging from the use of biodigesters bioremediation of effluents from the food industry use of microorganisms to produce polymers and their applications waste recovery new products development new applications for new varieties of crops replacement of fats in food improvement in bovine production and production and harvesting microalgae and cyanobacteria It includes current topics that include the application of biosystems for food processing the revaluation of agro industrial waste bioremediation systems as well as new trends in the development of food from start to finish The book also discusses the generation of value added products and new functional foods This informative book is a compendium of the use and application of biosystems in the food industry from primary production to processing waste evaluation and bioremediation that is an integral food production system As such the book will serve as a guide for those involved in the fields of biotechnology and agricultural sciences It will also prove useful for undergraduate and postgraduate students and those in the agro industrial sector

Handbook of Research on Industrial Applications for Improved Supply Chain Performance García-Alcaraz, Jorge Luis,Jamil, George Leal,Avelar-Sosa, Liliana,Briones Peñalver, Antonio Juan,2019-10-18 In the industrial world companies are always seeking competitive advantages to sustain themselves in the globalized market A supply chain is one of these improvements that managers implement in order to stay ahead of the competition However certain methods of supply chains add risks such as the addition of costs possible accidents and economic losses Because of this companies are looking for techniques in which to progress their supply chain execution The Handbook of Research on Industrial Applications for Improved Supply Chain Performance is a pivotal reference source that identifies techniques tools

and methodologies that can improve supply chain performance and enable businesses to generate a competitive advantage in the globalized market While highlighting topics such as material flow route optimization and green distribution this publication is ideally designed for managers executives logistics engineers production managers warehouse operations managers board directors consultants analysts inventory control managers researchers academicians industrial and managerial professionals practitioners and students looking to improve costs and quality of supply chains

Sustainable Agricultural Production Systems Romeo Rojas,Guillermo Cristian Guadalupe Martínez Ávila,Julia Mariana Márquez Reyes,Ma del Carmen Ojeda Zacarías,2024-11-22 Due to the growth of the world population food production has increased exponentially as have the agricultural production systems used to produce food This book presents both traditional and modern forms of agricultural production with an emphasis on sustainable practices The volume discusses seed improvement crop protection phytosanitary aspects protected agriculture plant factories hydroponic systems agricultural mechanization bioremediation reduction of herbicide use and characterization of bioactive compounds Some methods discussed include in vitro propagation greenhouse hydroponics biostimulants from algae cartography models of vulnerable environmental interactions nuclear and plastics engineering eco friendly extraction processes use of secondary metabolites in plant defense mechanisms and more

Electric Power Systems Resiliency Ramesh C. Bansal,Manohar Mishra,Yog Raj Sood,2022-07-14 Electric Power Systems Resiliency Modelling Opportunity and Challenges considers current strengths and weaknesses of various applications and provides engineers with different dimensions of flexible applications to illustrate their use in the solution of power system improvement Detailing advanced methodologies to improve resiliency and describing resilient oriented power system protection and control techniques this reference offers a deep study on the electrical power system through the lens of resiliency that ultimately provides a flexible framework for cost benefit analysis to improve power system durability Aimed at researchers exploring the significance of smart monitoring protecting and controlling of power systems this book is useful for those working in the domain of power system control and protection PSOP Features advanced methodologies for improving electrical power system resiliency for different architectures e g smart grid microgrid and macro grid Discusses resiliency in power generation transmission and distribution comprehensively throughout Includes case studies that illustrate the applications of resilience in power systems

Environmental Biotechnology Zaini Ujang,Mogens Henze,2004-08-31 The IWA Conference on Environmental Biotechnology Advancement in Water and Wastewater Application in the Tropics held in Kuala Lumpur Malaysia on 9 10 December 2003 was a peer reviewed conference It was specially organized for Malaysia and the Asia Pacific region in collaboration between Universiti Teknologi Malaysia UTM the International Water Association IWA the Malaysia Water Association and the Malaysian Biotechnology Directorate Papers presented in the conference covered current perspectives on the advancement of water and wastewater applications using environmental biotechnology as well as methodologies techniques modelling case studies directions and other specific issues

Advances in Sorghum Science Ratikanta Maiti,Humberto González Rodríguez,Ch. Aruna Kumar,Sameena Begum,2021-07-16 This new volume *Advances in Sorghum Science Botany Production and Crop Improvement* provides an easy to read and comprehensive treatment of the sorghum crop With the world s production of sorghum topping over 55 million tons annually sorghum is very important for as a staple dietary food for much of the world as a rich source of micronutrients and macronutrients as an ingredient in the processing of many foods and as a source of fodder The authors of the volume provide detailed information on sorghum from several disciplines and bring together recent literature under one umbrella The book covers the various aspects of the sorghum crop starting from its origin to its domestication and going on to biotechnology of the crop It describes sorghum production ideotypes botany physiology abiotic and biotic factors affecting crop productivity methods of cultivation postharvest management grain quality analysis for food processing improvement of sorghum crop and research advancements in breeding and biotechnology This valuable resource will be helpful to researchers and scientists working to understand the relation between various disciplines and the implementation of new methods and technology for crop improvement and higher productivity The multi pronged approach will help to enable the increase sorghum productivity to meet the world s growing demands

Fibroids, Menstruation, Childbirth, and Evolution Fred Burbank,2009 In the ancestral environment a human female typically carried at least half a dozen babies to term The fact that modern women are able to limit the number of children they bear has dramatic consequences for the incidence of uterine fibroids as well as the clinical care of fibroids patients *Fibroids Menstruation Childbirth and Evolution* explores these connections integrating a vast amount of medical knowledge about the uterus into one volume During pregnancy the mother s blood prepares for an enormous hemostatic event the delivery of the placenta That fetal organ is the vascular link between mother and offspring At childbirth one tenth of mother s cardiac output flows through the placenta feeding the growing child When the placenta is sheared away from its attachment to the uterus two hundred large uteroplacental arteries are ripped apart and bleed profusely into the uterine cavity For many hours following delivery uterine contractions slow blood flow within the uterus allowing the high concentration of clotting factors built up in the mother s blood during pregnancy to solidify throughout the uterine circulation and stop blood loss Then hours later the tide reverses most of these uterine blood clots dissolve and more normal blood flow returns to the uterus This amazing process occurs with each pregnancy During this process the uterus is ischemic and hypoxic Unlike brain and heart which can

only survive minutes of decreased blood flow the uterus can withstand dramatically diminished blood flow for hours In fact it is natural for this to occur once every few years Uterine ischemia and hypoxia are a natural part of every woman s genetic makeup In 1995 a group of French physicians discovered that it was possible to emulate the physiology of childbirth by stopping blood flow to the uterus with small plastic particles Initially they injected these particles to diminish blood loss during subsequent fibroid surgery However they soon learned that the injection of these particles was therapeutic in and of itself for women with symptomatic fibroids Unbeknownst to this French group earlier in 1964 an American physician surgically occluded the uterine arteries to treat women without fibroids who had excessive monthly menstrual blood loss Subsequent physicians have occluded the uterine arteries in various ways to treat a third common disorder adenomyosis Finally these clinical successes suggest that future episodes of endometriosis may be preventable in some women treated with uterine artery closure Dr Fred Burbank s comprehensive book provides insight into how physicians can use uterine artery closure techniques to more effectively treat uterine disorders In addition his book contains short courses on magnetic resonance imaging hemodynamics uterine artery embolization and the hemostatic and hemolytic systems making it possible for readers less familiar with these complex subjects to understand the text without referring to outside sources About the Author Dr Burbank is an epidemiologist a psychiatrist a diagnostic radiologist a cardiovascular interventionalist and an expert in women s health He is also an inventor entrepreneur For recreation he flies swims and reads For more information please visit his bio on www.saltcreekmedical.com

Autoecology and Ecophysiology of Woody Shrubs and Trees

Ratikanta Maiti,Humberto Gonzalez Rodriguez,Natalya Sergeevna Ivanova,2016-04-08 Forest trees and shrubs play vital ecological roles reducing the carbon load from the atmosphere by using carbon dioxide in photosynthesis and by the storage of carbon in biomass and wood as a source of energy Autoecology deals with all aspects of woody plants the dynamism of populations physiological traits of trees light requirements life history patterns and physiological and morphological characters Ecophysiology is defined by various plant growth parameters such as leaf traits xylem water potential plant height basal diameter and crown architecture which are in turn influenced by physiological traits and environmental conditions in the forest ecosystem In short this book details research advances in various aspects of woody plants to help forest scientists and foresters manage and protect forest trees and plan their future research Autoecology and Ecophysiology of Woody Shrubs and Trees is intended to be a guide for students of woody plant autoecology and ecophysiology as well as for researchers in this field It is also an invaluable resource for foresters to assist in effective management of forest resources
