University Of Pretoria 2015 Prospectus:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

From Student to Urban Planner Tuna

Taşan-Kok, Mark Oranje, 2017-12-06 For many young planners the noble intentions with going to planning school seem starkly out of place in the neoliberal worlds they have come to inhabit. For some the huge gap between the power they thought they would have and what they actually do is not only worrying but also deeply discouraging. But for some others practice means finding practical and creative solutions to overcome challenges and complexities. How do young planners in different settings respond to seemingly similar situations like these? What do they do: give up, adjust or fight back? What role did their planning education play and could it have helped in preparing and assisting them to respond to the world they are encountering? In this edited volume stories of young planners from sixteen countries that engage these questions are presented. The sixteen cases range from settings with older established planning systems e.g. USA, the Netherlands and the UK to settings where the system is less set e.g. Brazil being remodeled e.g. South Africa and Bosnia Herzegovina and under stress e.g. Turkey and Poland. Each chapter explores what might be done differently to prepare young planners for the complexities and challenges of their real worlds. This book not only points out what is absent but also offers planning educators an alternative vision. The editors and esteemed contributors provide reflections and suggestions as to how this new generation of young planners can be supported to survive, embrace and change the world they are encountering and in the spirit of planning endeavor to change it for the better.

From #RhodesMustFall Movements to #HumansMustFall Movements Artwell Nhemachena, Jairo

Kangira, 2021-05-14 Might it be possible that the world is being migrated into an era where the imperial periphery will be increasingly governed through Artificial Intelligence (AI) and robotics designed to replace human beings? Celebrated as efficient, strong, unfailing, tireless, precise and beyond corruption, AI and robots are set to replace African leaders who are imperially deemed to be and consistently condemned as corrupt, failed, weak and inefficient. But if these AI and robots are neo-imperial tools and machinations, the million-dollar question is whether empire is not returning to recolonise the supposedly inefficient Africans via the new technologies and machinism. Where Africans once celebrated their liberation war movements

empire has enmeshed what it calls liberation technologies designed to supposedly liberate African youths from their own states and governments led by liberation movements Where Africans once celebrated their liberation war movements empire has placed its own NGOs CSOs spewing liberal ideologies designed to ostensibly liberate African youths from their own supposedly failed and corrupt states and government leaders With African youths citizens allying not with their liberation movements but with the liberation technologies and liberal NGOs CSOs it is not surprising why African citizens oppose their states led Fast Track Land Redistribution Programmes while ironically they happily celebrate Fast Tracked COVID 19 Vaccines Posing the notion of HumansMustFall movements this book underscores ways in which empire is in a process of eternal return to 21st century Africa The book is crucial for scholars and activists in political science government studies sociology anthropology cultural studies history languages and communication studies security studies military studies and development studies
