Halvorsen: Sharing Knowledge, Transforming Societi, 2023-01-10 In June 2016 the Norwegian Programme for Capacity Development in Higher Education and Research for Development Norhed hosted a conference on the theme of knowledge for development in an attempt to shift the focus of the programme towards its academic content This book follows up on that event The conference highlighted the usefulness of presenting the value of Norhed s different projects to the world showing how they improve knowledge and expand access to it through co operation A wish for more meta knowledge was also expressed and this gives rise to the following questions Is this way of co operating contributing to the growth of independent post colonial knowledge production in the South based on analyses of local data and experiences in ways that are relevant to our shared

future Does the growth of academic independence as well as greater equality and the ability to develop theories different to those imposed by the better off parts of the world give rise to deeper understandings and better explanations Does it at least spread the ability to translate existing methodologies in ways that add meaning to observations of local context and data and thus enhance the relevance and influence of the academic profession locally and internationally This book in its varied contributions does not provide definite answers to these questions but it does show that Norhed is a step in the right direction Norhed is an attempt to fund collaboration within and between higher education institutions We know that both the uniqueness of this programme and ideas of how to better utilise the learning and experience emerging from it call for more elaboration and broader dissemination before we can offer further guidance on how to do things better This book is a first attempt

Recalibrating teacher training in African higher education institutions Sifiso Sibanda, Gideon (Deon) P. van Tonder, Washington T. Dudu, 2023-03-01 This book critically examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimaged to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark
