*Open and Distance Education in Asia, Africa and the Middle East* Olaf Zawacki-Richter, Adnan Qayyum, 2019-02-18 This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series following *Open and Distance Education in Australia, Europe and the Americas* Springer 2018. Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online open and distance education, this book will prove particularly valuable for policy makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

**The Legal Protection of Women From Violence** Rashida Manjoo,Jackie Jones,2018-03-22 Violence against women remains one of the most pervasive human rights violations in the world today and it permeates every society at every level Such violence is considered a systemic widespread and pervasive human rights violation experienced largely by women because they are women Yet at the international level there is a gap in the legal protection of women from violence There is currently no binding international convention that explicitly prohibits such violence or calls for its elimination or mandates the criminalisation of all forms of violence against women This book critically analyses the treatment of violence against women in the United Nations system and in three regional human rights systems Each chapter explores the advantages and disadvantages coming from the legal instruments the work of the monitoring systems and the resulting findings and jurisprudence The book proposes that the gap needs to be addressed through a new United Nations Convention on the Elimination of All Forms of Violence against Women or alternatively an Optional Protocol to the Convention on the Elimination of all Forms of Discrimination against Women A new Convention or Optional Protocol would be part of the transformative agenda that is needed to normatively address the promotion of a life free of violence for women the responsibility of states to act with due diligence in the elimination of all forms of violence against all women and the systemic challenges that are the causes and consequences of such violence

*South African Schooling: The Enigma of Inequality* Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world

South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI African Union Law Olufemi
