The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal *Globalizations* Harvesting Plant and Microbial Biodiversity for Sustainably Enhanced Food Security Laurent Laplaze, Francesca Sparvoli, Khaled Masmoudi, Charles Thomas Hash, 2018-03-19 The World population will reach 9 billion by 2050 with the majority of this growth occurring in developing countries On the other hand one in nine of the World's population suffers from chronic hunger the vast majority of which live in developing countries We therefore need to find new and sustainable solutions to feed this increasing population and alleviate the predicted negative impact of global changes on crop production This e Book deals with new strategies to improve food security and livelihoods in rural communities reduce vulnerability increase resilience and mitigate the impact of climate change and land degradation on agriculture This collection of 18 articles addresses the major abiotic factors limiting crop production worldwide how to characterize and exploit the available plant biodiversity to increase production and sustainability in agrosystems and the use of beneficial microbes to improve production and reduce the use of fertilizers and pesticides A Scholarship of Doctoral Education Petro du Preez, Shan Simmonds, 2018-11-21 This edited collection is cohesive by a focus on becoming becoming a doctoral student becoming a researcher becoming an academic and becoming a supervisor This journey of becoming takes us from pre enrolment in a doctoral programme through the many phases of candidature and into the post doctoral environment Both advancing theory and providing very practical examples this book is of immense value to doctoral students and academics not only in South Africa for whom it should be a mandatory read but also for doctoral education researchers doctoral students and supervisors worldwide as the themes covered extend well beyond the borders of South Africa
