University Of Limpopo Prospectus:

Cartographies of Nature Maano Ramutsindela, 2014-06-19 The ascendancy of border studies in the last two decades or so and the burgeoning work on nature and society neither drew attention to ecological theories of borders nor capitalised on nature as a useful avenue through which border research could be advanced This volume fills this void by engaging with the following key questions What insights can be drawn from species borders to broaden understandings of bordering What sorts of borders are engendered by various types of conservation areas What border stories does each of these areas tell us What do conservation related borders teach us about multiple lines that divide societies Answers to these questions help researchers understand a typology of nature related borders The primary objectives of this volume are twofold The first objective is to expand and deepen the links between nature conservation and border studies by bringing species borders into conversation with border studies while at the same time paying attention to diverse conservation areas and conservation practices The second objective is to highlight forms of borders associated with various types of conservation areas and the protection of certain types of natural resources The manner in which nature conservation produces borders and the forms those borders take has the potential to enrich the conceptualisation of borders The point of departure in this volume is that conservation practices produce feedback loops on social reality Authors in the volume variously show that concerns with environmental protection and management offer possibilities for exploring and even disrupting borders within society and those between society and nature Conservation areas in particular are crucial for a meaningful analysis of nature's borders and the discourses and narratives related to them and how such discourses influence conservation practice This volume is an invaluable resource for research and upper level courses on border studies political ecology conservation and biodiversity management and environmental change and social impact

In the Realms of Gold Roland Anthony Oliver, 1997 Born in India of British colonial parents Roland Oliver moved to Africa as a young man and became one of the continent's leading modern historians In this memoir he writes of his work in training African scholars to conduct regional surveys and collect oral histories in assembling the multivolume Cambridge History of Africa and in struggling to give African history academic legitimacy at a time when most universities did not have scholars qualified to teach even an elementary course in the subject Along the way Oliver considers the questions that engage Africanists today such as the significance of European colonialism in the historical development of the continent and whether nationalism did more harm than good in the formation of modern African states

Placing Critical Geography Lawrence D. Berg, Ulrich Best, Mary Gilmartin, Henrik Gutzon Larsen, 2021-11-29 This book explores the multiple histories of critical geography as it developed in 14 different locations around the globe whilst bringing together a range of approaches in critical geography It is the first attempt to provide a comprehensive account of a wide variety of historical geographies of critical geography from around the world Accordingly the chapters provide accounts of the development of critical approaches in geography from beyond the hegemonic Anglo American metropolises Bringing together geographers from a wide range of regional and intellectual milieus this volume provides a critical overview that is international and illustrates the interactions or lack thereof between different critical geographers working across a range of spaces The chapters provide a more nuanced history of critical geography suggesting that while there were sometimes strong connections with Anglo American critical geography there were also deeply independent developments that were part of the construction of very different kinds of critical geography in different parts of the world Placing Critical Geographies provides an excellent companion to existing histories of critical geography and will be important reading for researchers as well as undergraduate and graduate students of the history and philosophy of geography
