Purdue, 2022-10-20 This book explores the central role that gender has historically played in violent far right movements and groups in a time of increasing political polarisation and rising extremism The author examines the way neo Nazis and white supremacists have constructed gender and how this has impacted on the practical role of men and women on the global extreme right between 1969 and 2009 giving valuable insight into the inner workings of the extremist fringe today In the context of rising violent ultra nationalism in the UK Eastern Europe the USA India and Russia this transnational history of racist extremist movements offers a very necessary glimpse into the intimate personal politics of organised hate and into the ideological and organisational roots of our current moment In order to fully understand the extreme right it is essential to develop an awareness of the deep social foundations that underlie it By exposing the gendered basis of racist extremism in the USA and UK this book makes a necessary intervention in the field of far right studies shedding new light on the shadowy corners of the political spectrum and ultimately opening new avenues for countering hate on the personal political and academic level The book seeks to explain the intricate relationship between organised racist extremism and ideological misogyny and explores the fundamental contradictions and inconsistencies that underlie women s far right activism Offering historical context to the current social and political moment in which white supremacist and far right terror presents an immediate threat to security and stability in both the USA and the UK this book provides useful insights for those researching the history of fascism and the far right violent social movements and political activism as well

as women's history and gender studies A Century of Geography at Stellenbosch University 1920-2020 Gustav Visser, Jan de Waal, 2020-09-28 A Century of Geography at Stellenbosch University 1920-2020 focuses on the establishment and development of geography as an academic discipline at Stellenbosch South Africa's founding geography department. The ways in which the department currently operates are deemed fundamentally joined to its past and pave the way for the evolution of geography and its various subdisciplines going forward. The investigation seeks to highlight the development of the discipline and its institutionalisation as part of the academic offerings of the university while providing details about the teaching and research conducted as well as of the people who contributed to these endeavours. It also furnishes the academic geography community at Stellenbosch and geography more broadly with some insights into its past development and more recent changes along with a complete bibliography of conducted research *Civil Strife against Local Governance* Sethulego Matebesi, 2017-03-13 Hardly a day goes by without South Africans going on a rampage over the provision of basic municipal services such as water, electricity, sanitation and other municipal obligations. This book connects the critical issue of community protests to the equally precarious issue of political trust in local governance in South Africa by using comparative analysis of grassroots activism in predominantly black communities and predominantly white communities **South African Schooling: The Enigma of Inequality** Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in-depth discussions of literacy, numeracy, teacher development and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with: Are there different and preferential equilibria we have not yet thought of or explored and if so, what are they? In practical terms, how does one get to a more equitable distribution of teachers, resources and learning outcomes? While decidedly local, these questions resonate throughout the developing world. South Africa today is the most unequal country in the world. The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth. This is the largest 90/10 gap in the world and one that is reflected in the schooling system. Two decades after apartheid, it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin, the province of their birth and the wealth of their parents. Looking back on almost three decades of democracy in South Africa, it is this stubbornness of inequality and its patterns of persistence that demands explanation, justification and analysis. This is a landmark book on basic education in South Africa, an essential volume for those interested in learning outcomes and their inequality in South Africa. The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race, class and place. The book brings together the wealth of decades of research output from top quality researchers to explore what has improved, what has not and why. Prof Lant Pritchett, Harvard University. There is much wisdom in this collection from many of the best education analysts in South

Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Grid-locked African Economic Sovereignty Warikandwa, Tapiwa Victor, Nhemachena, Artwell, 2019-02-06 The emergent so called Fourth Industrial Revolution is regarded by some as a panacea for bringing about development to Africans This book dismisses this flawed reasoning Surfacing how investors are actually looting and plundering Africa how the industrial internet of things the gig economies digital economies and cryptocurrencies breach African political and economic sovereignty the book pioneers what can be called anticipatory economics which anticipate the future of economies It is argued that the future of Africans does not necessarily require degrowth postgrowth postdevelopment postcapitalism or sharing solidarity economies it requires attention to age old questions about African ownership and control of their resources Investors have to invest in ensuring that Africans own and control their resources Further it is pointed out that the historical imperial structural creation of forced labour is increasingly morphing into what we call the structural creation of forced leisure which is no less lethal for Africans Because both the structural creation of forced labour and the structural creation of forced leisure are undergirded by transnational neo imperial plunder theft robbery looting and dispossession of Africans this book goes beyond the simplistic arguments that Euro America developed due to the industrial revolutions
