Open and Distance Education in Asia, Africa and the Middle East Olaf Zawacki-Richter, Adnan Qayyum, 2019-02-18 This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series following *Open and Distance Education in Australia, Europe and the Americas* (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online open and distance education, this book will prove particularly valuable for policy makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

The African Charter on Human and Peoples' Rights Rachel Murray, 2019-02-14 The African Charter on Human and Peoples' Rights (ACHPR) is the principal regional human rights treaty for the African continent. Adopted in 1981, there is now a significant body of jurisprudence and interpretation by its African Commission on Human and Peoples' Rights and the recently established African Court. This volume provides a comprehensive article by article legal analysis of the provisions of the Charter as it draws upon the documents adopted by the African Commission including resolutions, case law and concluding observations. Where relevant, case law adopted by the African Court on Human and Peoples' Rights and that of other sub-regional courts and tribunals and domestic courts in Africa are also incorporated. The book examines not only the substantive rights in the African Charter but also the work of the African Commission on Human and Peoples' Rights and provides a full examination of its mandate. A critical analysis of each of the provisions of the ACHPR is led principally by the jurisprudence and documentation of the African Commission and African Court. The text also identifies the overall development of the ACHPR within the broader regional and international human rights legal arena.

Higher Education as a Tool for Progress in South Africa D. D. Tewari, 2024-10-08 Education is a tool used to elevate citizens from poverty and unemployment and thus contributes to nation building and the promotion of a knowledge-based society in the information age. South Africa can take a cue from Asia and its rapid industrialization in the 1970s and its subsequent progressive education. The book is an illustrious historical and lucid discussion and commentary on the changing nature of education in the South African higher education sector in particular. It covers a canvass of issues on higher education and the knowledge industry in the South African context and possible challenges that lie ahead. The twin challenges of low enrollment and high dropout rates in South African universities, especially at first year level, are alarming and robbing the country of its economic

potential It is the need of the hour to collaborate on an international level to spur knowledge creation and economic growth which South Africa so desperately needs The book is a welcome addition for policy makers and research scholars in higher education

ECCWS 2017 16th European Conference on Cyber Warfare and Security Academic Conferences and Publishing Limited, 2017 **Teaching for Change** L. Juliana Claassens, 2019-03-13 Contributors from various theological higher education institutions in South Africa and beyond come together to reflect on the best pedagogical practices to teach on often complex issues of gender sexual orientation race and class and on how they impact on health in our classrooms in our churches and in the communities where we live and work Educational Leadership in Becoming Nuraan Davids, Yusef Waghid, 2016-08-25 Educational Leadership in Becoming reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy curriculum inquiry and pedagogical action The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an

educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society It should also appeal to those interested in the philosophy of education

Revisiting State Personhood and World Politics Bianca Naude, 2021-12-16 Breathing fresh air into debates surrounding foreign policy and interstate relations Bianca Naude presents a holistic theory of states as collectives of people that cannot be reduced to their individual constituents Moving among current research on the ontological status of the state alongside important arguments in support of the state personhood thesis Naude begins by exploring Freud's personality theory and the ways in which this theory has evolved over time in response to newer insights from the field of experimental psychology Recognizing that Freud's work is in many ways outdated she considers more recent literature on narcissism as an aspect of self esteem rather than a form of psychopathology drawing specifically on Kohut's expansion of the concept of narcissism as a normal feature of personality development Using the South African state as a case study Naude demonstrates the various ways in which the state presents itself to the outside world on the one hand and how it wishes to see itself on the other She further considers how narcissistic defenses help protect the state's ego from criticism and self judgments *Revisiting State Personhood and World Politics* will help readers understand how the state sees itself why or when the state experiences shame humiliation guilt or pride and how it responds to these self conscious emotions It will be a valuable resource to researchers and students of International Relations

of the documents drawings and photographs in the book are unpublished and include classified material and photographs from the National Nuclear Research Centre negatives of 1960s from Pretoria News and documents and pamphlets from Afrikaner Broederbond archives State architecture became the most iconic public manifestation of an evolving expression of white cultural identity as a new generation of architects in Pretoria took up the challenge of finding form to their prospects and beliefs It was an opportunistic faith in Afrikaners who urgently needed to entrench their vulnerable and contested position on the African continent The shift from provincial town to apartheid capital was swift and relentless Little was left to stand in the way of the ambitions and aim of the state as people were uprooted and forcibly relocated structures torn down and block upon block of administration towers and slabs erected across Pretoria This book will be of great interest to students and scholars of architectural history as well as those with an interest in postcolonial studies political science and social anthropology
