Mergers in Higher Education Leon Cremonini, Saeed Paivandi, K.M. Joshi, 2019-05-23 The merger is broadly understood as a fusion of two or more units into one The merger in higher education has received much attention by policy makers as well as individual institutions in many countries as a means to bring higher education reforms The merger of higher education institutions is a visible phenomenon in the recent past but each merger provides a distinctive instance of major strategic change Besides this each merger also shows a distinct set of circumstances actors and characteristics The aims of the mergers have been varied across the nations that include a reduction in fragmentation of institutions economies of scale enhanced efficiency enhanced quality etc Along with disapproval a great amount of literature surrounding the benefits of the merger has emerged over the period of time In spite of ample literature on mergers of higher education institutions there does not appear to be a clear set of financial efficiency or quality parameters to assess the success The majority of the discussions have been narratives In the available literature the mergers have been classified based on their participants stakeholders nature the strategy that drives them their motivation and or the resultant degree of absorption This book discusses the merger experiences and case study of different countries in terms of policies and practices Each country chapter in the above context narrates that in planning the mergers what have been the philosophical economic political legal and cultural implications How the factors such as institutional history geographical distance provincial tradition state regulations the presence of collective bargaining and pertinent financial matters shaped the process as well as the outcome of the mergers The idea of merger and its implementation including process at both government and institutional level have been discussed The outcome assessment also forms the part of the discussion

contributors providing insights from the humanities the social sciences and evolutionary science this book will be of great interest to students and scholars of political science sociology history institutional economics Nordic studies and human evolution studies

Politics, Policy, and Public Options Ganesh Sitaraman, Anne Alstott, 2021-07-01 A public option is a government provided social good that exists alongside a similar privately provided good While the public option is typically identified with health care policy public options have been a longstanding feature of American life in a variety of sectors ranging from libraries to swimming pools Public schools for example coexist alongside private schools However there is surprisingly little research on public options as a general category Rather over the last few decades considerable scholarly and popular efforts to ensure access to important social goods have focused on market subsidies like vouchers or privatization which both face increasing criticism Uniting scholars from across disciplines this volume delves into the theory of the public option explores several important case studies and shows how public options could be a corrective to the trend toward privatization and subsidies This title is also available as Open Access on Cambridge Core
