New Public Leadership Douglas F. Morgan,Marcus D. Ingle,Craig W. Shinn,2018-09-03 Most leadership literature stems from and focuses on the private sector emphasizing personal qualities that bind leaders and followers to a shared purpose As the authors of New Public Leadership argue if these shared purposes do not build trust and legitimacy in public institutions such traditional leadership tropes fall short of the standard demanded by contemporary public servants For twenty years the authors have been developing a leadership education and training framework specifically designed to encourage public service professionals to lead from where they sit This book presents that comprehensive integrated and practical leadership framework grounded in the uniqueness of public legal missions culture history and values The authors explore three key elements of leadership success 1 an understanding of our public service context including the history the values and the institutions that comprise our leadership setting 2 a set of tools designed to help leaders initiate collective action in wicked challenge settings and 3 tools to support sound judgment enabling leaders to

do the right thing in the right circumstances for the right reasons The authors further provide readers with a basic understanding of democratic institutions encouraging them to work within and across multiple vertical and horizontal systems of authority The book is organized into four sections each of which is accompanied by a Master Case that provides the reader with an opportunity to apply the principles and leadership tools discussed in the text to practice To further reinforce the practice centered approach to leadership knowledge and skills the authors have developed an accompanying EMERGE Leadership Handbook complete with exercises available online Written specifically with the practicing public manager in mind this book arms public servants with a large repertoire of leadership skills designed to accommodate changing public values and conflicting priorities at all levels of our public organizations [Resources in Education](#) ,2001

Leadership and Narcissism in the Organization Mateusz Grzesiak,2022-11-11 Narcissists are seen as people who could inspire others due to their strong charisma great vision and ability to convince the crowd that they possess features that others don't They have followers and fans and the ability to control them On the other hand narcissistic leaders express a lack of empathy and high levels of aggression and show constant criticism of others while refusing feedback on their performance Those features indicate that such leaders have a strong sense of entitlement of superiority therefore it is hard to work with them In the corporate world many individuals with narcissistic personalities are chosen as leaders of organizations or teams which often harms their co workers and subordinates Very few lower level employees have a positive perception of their narcissistic leaders or are satisfied with their job and so there is need to measure through qualitative research based on already existing articles in a given subject the correlation between the perception of narcissistic leader and the leader evaluation method This book gives insight into psychology and management by linking the narcissistic personality with the leadership role and with the method of evaluating a leader along with discussing the positive or negative outcomes of their leadership Readers will learn about the phenomenon of narcissistic individuals and leaders as well as the attributes and traits of such a person This research monograph will be of interest to researchers academics and advanced students in the fields of work and organizational psychology and leadership studies **Proceedings of the ...
