### 5.11.2 Testing and Adjustment

#### 5.11.2.4 Track Brake Release Pressure

##### (Checking left track brake release pressure)

1. Start the engine, raise the machine off the safety stand, and remove the stand. Swing the attachment to the left side, and lower the attachment to raise the left track off the ground.

##### Note!

On machines equipped with a harvesting attachment, use a support stand under the stick boom to raise the track off the ground.

Alternately, the attachment can be removed at the rotator link, leaving the hoses attached. Then, swing the boom to the side of the attachment and lower it to the ground to raise the track.

2. Install a safety support stand beneath the undercarriage and lower the machine onto the support stand.

3. Release the hydraulic tank pressure by depressing the air vent poppet.
