Cartographic Strategies of Postmodernity Peta Mitchell, 2013-01-11 The last fifty years have witnessed the growing pervasiveness of the figure of the map in critical theoretical and fictional discourse References to mapping and cartography are endemic in poststructuralist theory and similarly geographically and culturally diverse authors of twentieth century fiction seem fixated upon mapping While the map metaphor has been employed for centuries to highlight issues of textual representation and epistemology the map metaphor itself has undergone a

transformation in the postmodern era This metamorphosis draws together poststructuralist conceptualizations of epistemology textuality cartography and metaphor and signals a shift away from modernist preoccupations with temporality and objectivity to a postmodern pragmatics of spatiality and subjectivity Cartographic Strategies of Postmodernity charts this metamorphosis of cartographic metaphor and argues that the ongoing reworking of the map metaphor renders it a formative and performative metaphor of postmodernity *A Socio-cultural Perspective on Patient Safety* Justin Waring,2017-11-01

This edited volume of original chapters brings together researchers from around the world who are exploring the facets of health care organization and delivery that are sometimes marginal to mainstream patient safety theories and methodologies but offer important insights into the socio cultural and organizational context of patient safety By examining these critical insights or perspectives and drawing upon theories and methodologies often neglected by mainstream safety researchers this collection shows we can learn more about not only the barriers and drivers to implementing patient safety programmes but also about the more fundamental issues that shape notions of safety alternate strategies for enhancing safety and the wider implications of the safety agenda on the future of health care delivery In so doing *A Socio cultural Perspective on Patient Safety* challenges the taken for granted assumptions around fundamental philosophical and political issues upon which mainstream orthodoxy relies The book draws upon a range of theoretical and empirical approaches from across the social sciences to investigate and question the patient safety movement Each chapter takes as its focus and question a particular aspect of the patient safety reforms from its policy context and theoretical foundations to its practical application and manifestation in clinical practice whilst also considering the wider implications for the organization and delivery of health care services Accordingly the chapters each draw upon a distinct theoretical or methodological approach to critically explore specific dimensions of the patient safety agenda Taken as a whole the collection advances a strong coherent argument that is much needed to counter some of the uncritical assumptions that need to be described and analyzed if patient safety is indeed to be achieved **Contemporary Art, World Cinema, and Visual Culture** Hamid Keshmirshekan,2019-03-29

Public Art (Now) Claire Doherty,2015-03-09 *Public Art Now Out of Time Out of Place* is the first survey of progressive public art from around the world It presents some of the most significant artworks in the public realm from the last decade

challenging preconceptions about where when and how public art takes place The face of public art is changing For decades art in the public realm has been characterized by the landmark sculpture or spectacular outdoor event that helps to define or brand a place But in recent years a new wave of international artists and producers has rejected the monumental scale and mass appeal of such artworks Instead these individuals and groups favour unconventional forms that unsettle rather than authenticate a place s identity disrupt rather than embellish a particular location and contest rather than validate the design and function of public space Performed interactions collaborative social movements and small scale subversive acts are just some of the unorthodox approaches taken by these artists Their works challenge preconceived ideas about the role of art in place making as they seek to remake places through radical forms and practices Public Art Now Out of Time Out of Place presents the artists who have been redefining the practice of public art over the past decade They directly address the most pressing issues of our time including the encroachment of corporate concerns on public space the implications of global migration and the isolation of the individual and the potential of collective action to share the future of our towns and cities Some forty key works from around the world are organized into five sections Displacement Intervention Disorientation Occupation and Perpetuation with detailed descriptions and dozens of installation and process shots Interviews and quotes from practitioners commissioners and commentators reveal the impetus and context for the projects while the editor s introduction sets out the conceptual practical and ethical issues raised by the works Bringing together the most significant artworks in the public realm of the last ten years from ephemeral interventions to long term ongoing projects this dynamic survey is an essential reference for anyone interested in the ideas issues and impulses behind progressive public art and an accessible introduction to one of the most vibrant areas of contemporary art

Mapping Out the Research-policy Matrix

Germán Solinís, Nicolas

Baya-Laffite,2011-01-01 Social science research provides not only abstract conceptual knowledge about society but also concrete instrumental knowledge It enables us to take action to recompose the world we live in However this book rejects narrow and simplistic conceptions of research use and its impact on policy making to embrace a more complex approach to seeing and dealing with social science In the paradigm of evidence based policy evidence is understood in its broad sense as information that helps form policies Nonetheless within current practices and discourse it is not clear what information is what is really meant by evidence and how it can be obtained objectively The book draws on papers presented at the International Forum on the Social Science Policy Nexus where experts examined current practices and problems in areas such as social policy migration urban policies and globalisation The Forum set a precedent in terms of dialogue between researchers and policy makers The authors contribute to enriching and elucidating the most common conceptualisations of the research policy nexus They represent a rich diversity of views although most agree that an effective strategy to enhance social science policy linkages should be underpinned by a theoretical and methodological framework that takes into account the interplay of different social actors

Cultures of Globalization Kevin Archer,M. Martin Bosman,M. Mark Amen,Ella Schmidt,2013-09-13 Much has been written about the economic and political implications of the contemporary process of globalization Much less has been written about the specific cultural implications Previously published as a special issue of Globalizations this book seeks to add to our knowledge of the latter by bringing together researchers from different disciplines with the common goal of exploring the emerging cultural relations among groups and individuals in terms of coherence and hybridity identity and allegiance and cooperation and conflict As the world's peoples increasingly travel work trade recreate and otherwise communicate with each other relative cultural isolation and isolationism is becoming less and less possible What does this mean for cultural coherence stability and identity across the planet What have been the cultural implications of and reactions to this increasing global interdependence among peoples From more global and theoretical perspectives to more empirical and case specific approaches the various authors attempt to come to terms with the ever evolving and complex cultural content of contemporary globalization
