Community Series: Towards a Meaningful Instrumental Music Education. Methods, Perspectives, and Challenges - Volume II Andrea Schiavio, Marja-Leena Juntunen, Dylan van der Schyff, Luc Nijs, 2024-02-26 Trying to understand the complex interplay

between effective learning and personal experience is one of the main challenges for instrumental music education. Much of the research that focuses on effective learning outcomes often adopts experimental methodologies that do not allow for a thorough examination of the subjective and social processes that accompany each student's musical journey. On the contrary, contributions dedicated to the detailed analysis of the learners' lived experience often do not offer generalizable outcomes to different types of learning and teaching.

Transforming Education in Practice Wai-yan Ronald Tang, 2021-12-09 This book inspires educational practitioners with special regard to the way how practice in the frontline service is able to inform leadership and policy decision. It empowers them to identify what features are counted as professional and how they could be turned into sources for developing wise judgment and eliciting creative acts in teaching, lesson planning and course design, collaboration and knowledge excavation to shape policy decision and planning. In addition, for those who are used to conceive the world and their practice from a positivist tradition, may find the insights of this book illuminating, particularly when they are looking for a paradigm shift in understanding their practice. Last but not least, educators and teacher educators in particular will find the ideas in this book more promising in escalating the awareness of teachers of the next generation towards what is good phronesis in terms of their professional attitude and actual performance informed by both *techne* and *episteme* in their relevant settings.

Deconstructing Teacher Education in Contemporary Times Alka Behari, 2025-09-11 The book provides a comprehensive overview of the field of teacher education and analyses its concepts, ideas, notions, theories, debates and practices. In this, the journey of the development of teacher education in the global context and the policy journey of teacher education in India is traced in an interesting manner. Several dimensions of teacher education are revisited with a view to compel the readers to reflect upon alternate ways of looking at them. An examination of how the underlying socio-political factors affect teacher education, the initial preparation of teachers and their continued professional development forms a significant part of the book. What are the debates and issues in teacher education? Are there ready-made solutions to resolve them? Are there questions that are better left open-ended which researchers continue to analyse and grapple with? Engaging the readers in such a reflective exercise and taking them on a journey of exploring the large and new vista that teacher education has come to embody will enable them to understand it both as a discipline and a field of practice. Given that teacher education is a compulsory component in all teacher education institutions, this anthology will be an essential reading for students, scholars, teachers and teacher educators. It will be useful and purposeful for policymakers, organisations and professionals working in the area of teacher education. The variety of themes covered and the diverse styles of writing coupled with a unifying thread of building up the discourse in teacher education in contemporary times endow the book with a multicultural flavour. A must-read for all.
