Ironies of Solidarity Erik Bähre, 2020-01-15 Set in one of the world's most unequal and violent places this ethnographic study reveals how insurance companies discovered a vast market of predominantly poor African clients After apartheid ended in 1994 South Africa became a testing ground for new insurance products new marketing techniques and pioneering administrative models with a potentially global market Drawing on Rorty's notion of irony for understanding how the contradictions inherent to solidarity affect inequality and conflict as well as drawing on a vast array of case studies *Ironies of Solidarity* examines how both Africans enjoy the freedoms that they have gained in financial terms and how the onset of democracy effected the risks faced in everyday life Bähre examines the ways in which policies are sold and claims are handled offering a detailed analysis of South Africa's insurance sector

Brunt,John Kiff,2006-12-01 What is in Creating Lean Dealers Creating Lean Dealers is a DIY guide to enable dealers to achieve such a step change for themselves It works through using examples diagrams and detailed instructions how to transform performance in service and repair Then it goes on to describe how the same logic can be applied to all other areas of the dealer business to give a win win win for customers dealer staff and shareholders The journey to becoming a Lean dealer begins by getting a real understanding of two things The ability of the processes in the dealership to deliver right first time on time at every step a measure that authors David Brunt and John Kiff call Customer Fulfilment because it is the core of what customers value The actual demand on those processes and separating it into different types The next step is to use these measures together with a map of the current state of the process to define and prioritise what the problems are and then address them with the teams who do the work in a structured way using the Plan Do Check Act method of improvement A series of questions then guides the dealer to develop a future state map of the process a picture of what the process will look like typically in 6 months time when the problems have been addressed and some of the wastes eliminated so that more of the time is spent creating the value that customers want what Lean thinkers call Flow An accompanying action plan lists the bite sized steps needed to achieve the transformation But like every transformational change management plays a critical role Without a fully committed CEO leading from the top improvements are almost certainly doomed to fail It soon becomes apparent that management has to question and sometimes unlearn many of its traditional management methods Core to this is shifting the mind set from managing results to managing processes using visual progress boards rather than computers on a daily or even an hourly basis because good results are a direct product of good processes *Popular Mechanics* ,1985-07
