Langworth, Jan P. Norbye, 1986 Understanding FDI-Assisted Economic Development Sanjaya Lall, Rajneesh Narula, 2013-09-13 It is nowadays well accepted that both economic growth and development are highly dependent on improving not just the availability of capital but also access to technological capabilities infrastructure and resources This has gone hand in hand with an increasing economic liberalization of most

developing countries The role of the MNE as a viable source of both capital and technology is one of the key features of this new openness In the process of embracing FDI as a solution to the myriad of economic ills something even the World Bank has begun to do little attempt is made to understand the rationale and the costs associated with this policy stance Simply put FDI is not a condition sine qua non for development Too much emphasis has been placed on attracting FDI and not on understanding how to optimise the benefits for the host economy This volume aims to encourage and promote research related to these issues This volume was previously published as a special issue of the European Journal of Development Research **Japanese Technical Abstracts** ,1987 **East Asian Regionalism** Christopher M. Dent,2008-02-19 East Asia is a region that holds much fascination for many people It is one of the world s most dynamic and diverse regions and is also becoming an increasingly coherent region through the inter play of various integrative economic political and socio cultural processes Such a development is generally referred to as regionalism which itself has become a defining feature of the contemporary international system and this book explores the various ways in which East Asian regionalism continues to deepen Focusing on the main themes of the East Asia region and the study of regionalism economic regionalism and East Asia s new economic geography Southeast Asia and the Association of Southeast Asian Nations ASEAN trans regionalism East Asia s new free trade agreement trends and key transnational issues in East Asia such as international migration and energy security East Asian Regionalism will be an essential text for courses on East Asian regionalism Asian politics and Asian economics Key pedagogical features include end of chapter study questions case studies that discuss topical issues with study questions also provided useful tables and figures which illustrate key regional trends in East Asia extensive summary conclusions covering the chapter s main findings from different international political economy perspectives
