water governance jigsaw e.g. water trade improved water use efficiency users collective action public participation are not free of difficulties and shortcomings. The book explores the growing need for maintaining Spain's natural capital and the human component of water governance: people's needs, wishes, vested interests, aspirations that often determine the result of decisions and sometimes lead water management to a deadlock. This book takes a step forward in showing a more complex and also closer to reality picture of water governance in Spain.
