Wan Ted Experts Sans Gain:

Hackers Wanted Martin C. Libicki, David Senty, Julia Pollak, 2014-06-18 The perceived shortage of cybersecurity professionals working on national security may endanger the nation's networks and be a disadvantage in cyberspace conflict RAND examined the cybersecurity labor market especially in regard to national defense Analysis suggests market forces and government programs will draw more workers into the profession in time and steps taken today would not bear fruit for another five to ten years

The Crisis of Expertise Gil Eyal, 2019-10-24 In recent political debates there has been a significant change in the valence of the word experts from a superlative to a near pejorative typically accompanied by a recitation of experts many failures and misdeeds In topics as varied as Brexit climate change and vaccinations there is a palpable mistrust of experts and a tendency to dismiss their advice Are we witnessing therefore the death of expertise or is the handwringing about an assault on science merely the hysterical reaction of threatened elites In this new book Gil Eyal argues that what needs to be explained is not a one sided mistrust of experts but the two headed pushmi pullu of unprecedented reliance on science and expertise on the one hand coupled with increased skepticism and dismissal of scientific findings and expert opinion on the other The current mistrust of experts is best understood as one more spiral in an on going recursive crisis of legitimacy The scientization of politics of which critics warned in the 1960s has brought about a politicization of science and the two processes reinforce one another in an unstable crisis prone mixture This timely book will be of great interest to students and scholars in the social sciences and to anyone concerned about the political uses of and attacks on scientific knowledge and expertise
