Water Quality Management In Lake Kivu Basin Dr Congo:

Water Quality Management in Lake Kivu Basin, Dr Congo Arthur Bisimwa Mubwebwe, Fredrick Mwanuzi, Joel Nobert, 2014-12-12 Water quality management in the world is an issue of very high significance. Indeed, it has got socio-cultural, economic, and ecological values. Water in DR Congo does not spare this reality. This book tackles the major pollution inflow routes and to assess suitability of water for domestic, industrial, recreational, and other uses in the lake littoral zones of Lake Kivu basin, especially in Bukavu sub-basin. The analysis of data collected from rivers Kahuwa, Wesha, and Tshula and canals from the brewery and pharmaceutical factory flowing into Lake Kivu and in the littoral lake zones revealed that these ones were polluted, but the highest concentration was obtained in River Kahuwa. This one has been identified as the principal source of the pollution load into Lake Kivu in Bukavu sub-basin. Environmentalists and ecologists should be aware of the fact that most of nutrients in Bukavu sub-basin are attributed to wastewater discharges from industries, market, and domestic wastes runoff from city and anthropogenic activities. To fight this, we need to educate different stakeholders so as to reduce the incoming nutrients, prevent and monitor future degradation of the Lake Kivu.

Hydroclimatic Extremes in the Middle East and North Africa Ahmed Mohammed Hussain El Kenawy, El Sayed Mohamed Robaa, Mohammed Magdy Mustafa Torab, Mohamed Hereher, 2024-05-29 Hydroclimatic Extremes in the Middle East and North Africa: Assessment, Attribution, and Socioeconomic Impacts focuses on assessing the current situation of hydroclimatic extremes in the MENA region with particular emphasis on dry and wet extreme events. The results of the rapidly changing atmospheric and oceanic situations of these extremes will be addressed, presenting examples for the environmental, socioeconomic, and cultural impacts of these events in the region and evaluating the current ability to monitor and adapt to such events, as well as exploring the potential use of advanced geospatial techniques in improving current understanding of these extreme events. The book utilizes a multidisciplinary approach with various state-of-the-art methods, approaches, and analytical techniques in environmental, meteorological, and hydrological sciences, providing case studies from the Middle East and North Africa. It will provide a solid basis for scientists to assess the validation of several research methods in the region and may be applicable to other regions as climate change continues to cause increasing aridity worldwide. The case studies presented will reflect the multifaceted character of hydrometeorological extremes in the region with representative examples for the environmental, socioeconomic, and cultural impacts of climate change. Therefore, this book is a valuable source for climatologists, meteorologists, hydrologists, geographers, and water resources scientists. Thoroughly details the effects of climate variability in the Middle East and North Africa, a hotspot region of climate change vulnerability. Examines changes in hydroclimatic extremes at different spatial scales, ranging from local assessments to investigations that cover the entire region. Provides a comprehensive assessment of hydrometeorological feedback to current and future climate change in the MENA region. Fills the current gap in the literature concerning the response of arid and semiarid regions to climate change with particular
