**Peace-Sustainability-Climate Security Nexus** Bernard Amadei, 2023-11-28 Promoting peace and sustainability in human development while accounting for the risks associated with the impact of climate change on society has become more imperative than ever when addressing humanity's challenges of the twenty-first century. There is enough evidence that peace, sustainability, and climate security are entangled with multiple complex interactions and cannot be dealt with in isolation and independently from the environment and the numerous systems with which they interact. Yet the intersection of peace, sustainability, and climate security or their opposites, i.e., conflict, unsustainability, and climate vulnerability, is rarely articulated with a systemic mindset. A multi-solving nexus approach is more appropriate to capture the complexity and uncertainty of how the three sectors of peace, sustainability, and climate security play a role in community development, the nature of their causal chains, and the feedback on how community development affects the three sectors. *Navigating the Complexity Across the Peace-Sustainability-Climate Security Nexus* explores the value proposition of using a systems approach methodology and tools to comprehend and model that dynamic. Features of the book: Explores the interaction between the different components of peace and the relationship between peace, sustainability, and climate security using semi-qualitative and quantitative tools. Explains how climate adaptation and mitigation are related to peace or conflict. Presents generic system dynamics modeling that can be used in different contexts.      *Climate Change Solutions and Environmental Migration* Anna Ginty, 2021-04-20 This book lifts the taboo on maladaptation, a different driver of environmentally induced migration, which shines a light on the negative consequences arising from the solutions to climate change adaptation and mitigation policies. Through a systematic analysis and critique of existing mitigation and adaptation policies under the United Nations Framework Convention on Climate Change (UNFCCC) and international development community and supplemented by a small empirical study in Indonesia, this book catalogues how maladaptation is manufactured under existing climate change solutions. It posits that customary communities in general and women in particular are disproportionately affected by the dominant market-driven logics that underscore current climate change solutions adopted by the UNFCCC. The injustice of maladaptation is highlighted as multi-faceted and explored using political, economic, social, and ecological lenses, and the concept of environmental reintegration is also explored as a possible solution to this issue. Further possibilities are then presented in the Afterword as a combination of what the new post-neoliberalism conjuncture could potentially look like. This

volume will be of great interest to students scholars and practitioners of climate change environmental policy environmental migration and displacement development studies I NGOs and civil society actors and activists more broadly State, Foreign Operations, and Related Programs Appropriations for 2017 United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs, 2016 *China's Foreign Policy Contradictions* Tim Nicholas Rühlig, 2022 China's rise to great power status is indisputable but can it shape the future international order This question remains widely debated because China's foreign policy is contradictory Contrary to conventional wisdom this book shows that China does not act from a position of strength but that foreign policy contradictions are the result of the domestic vulnerabilities of the ruling Chinese Communist Party Providing exceptional insights into the considerations behind the opaque institutional structures of Chinese foreign policymaking and decision making it shows that China will not provide a model for a new international system but could undermine the existing order

Walt, 2018-10-16 A provocative analysis of recent American foreign policy and why it has been plagued by disasters like the forever wars in Iraq and Afghanistan Instead of a long hoped for era of peace and prosperity relations with Russia and China have soured the European Union is wobbling nationalism and populism are on the rise and the United States is stuck in costly and pointless wars that have squandered trillions of dollars and undermined its influence around the world The root of this dismal record Walt argues is the American foreign policy establishment's stubborn commitment to a strategy of liberal hegemony Since the end of the Cold War Republicans and Democrats alike have tried to use US power to spread democracy open markets and other liberal values into every nook and cranny of the planet This strategy was doomed to fail but its proponents in the foreign policy elite were never held accountable and kept repeating the same mistakes Donald Trump's erratic and impulsive

style of governing combined with a deeply flawed understanding of world politics made a bad situation worse. The best alternative Walt argues is a return to the realist strategy of offshore balancing which eschews regime change, nation building and other forms of global social engineering. The American people would surely welcome a more restrained foreign policy one that allowed greater attention to problems here at home. Clear-eyed, candid and elegantly written, Stephen M. Walt's *The Hell of Good Intentions* offers both a compelling diagnosis of America's recent foreign policy follies and a proven formula for renewed success. Thought provoking. This excellent analysis is cogent, accessible and well argued. Publishers Weekly starred review.

*The Disruptive Impact of Lethal Autonomous Weapons Systems Diffusion* Austin Wyatt, 2021-11-04. Challenging the focus on great powers in the international debate, this book explores how rising middle power states are engaging with emerging major military innovations and analyses how this will affect the stability and security of the Indo-Pacific. Presenting a data-based analysis of how middle power actors in the Indo-Pacific are responding to the emergence of military Artificial Intelligence and Killer Robots, the book asserts that continuing to exclude non-great power actors from our thinking in this field enables the dangerous diffusion of Lethal Autonomous Weapon Systems (LAWS) to smaller states and terrorist groups and demonstrates the disruptive effects of these military innovations on the balance of power in the Indo-Pacific. Offering a detailed analysis of the resource capacities of China, United States, Singapore and Indonesia, it shows how major military innovation acts as a circuit breaker between competitor states, disrupting the conventional superiority of the dominant hegemonic state and giving a successful adopter a distinct advantage over their opponent. This book will appeal to researchers, end users in the military and law enforcement communities and policymakers. It will also be a valuable resource for researchers interested in strategic stability for the broader Asia-Pacific and the role of middle power states in hegemonic power transition and conflict.

**Neoclassical Realist Theory of International Politics** Norrin M. Ripsman, Jeffrey W. Taliaferro, Steven E. Lobell, 2016-03-25 Since Gideon Rose's 1998 review article in the journal World Politics and especially following the release of Lobell Ripsman and Taliaferro's 2009 edited volume Neoclassical Realism the State and Foreign Policy neoclassical realism has emerged as a major theoretical approach to the study of foreign policy on both sides of the Atlantic Proponents of neoclassical realism claim that it is the logical extension of the Kenneth Waltz's structural realism into the realm of foreign policy In Neoclassical Realist Theory of International Relations Norrin M Ripsman Jeffrey W Taliaferro and Steven E Lobell argue that neoclassical realism is far more than an extension of Waltz's structural realism or an effort to update the classical realism of Hans Morgenthau E H Carr and Henry Kissinger with the language of modern social science Rejecting the artificial distinction that Waltz draws between theories of international politics and theories of foreign policy the authors contend neoclassical realism can explain and predict phenomena ranging from short term crisis behavior to foreign policy to patterns of grand strategic adjustment by individual states up to long term patterns of international outcomes It is therefore a more powerful theory of international politics than structural realism Yet it is also a more intuitively satisfying approach than liberal Innenpolitik theories or constructivism The authors detail the variables and assumptions of neoclassical realist theory address various aspects of theory construction and methodology lay out the areas of convergence and sharp disagreement with other leading theoretical

approaches liberalism constructivism analytic eclecticism and foreign policy analysis FPA and demonstrate how neoclassical realist theory can be used to resolve longstanding puzzles and debates in international relations theory **Routledge Handbook of Peace, Security and Development** Fen Osler Hampson, Alpaslan Özerdem, Jonathan Kent, 2020-06-04 This Handbook offers a comprehensive examination of the peace security and development nexus from a global perspective and investigates the interfaces of these issues in a context characterised by many new challenges By bringing together more than 40 leading experts and commentators from across the world the Handbook maps the various research agendas related to these three themes taking stock of existing work and debates while outlining areas for further engagement In doing so the chapters may serve as a primer for new researchers while also informing the wider scholarly community about the latest research trends and innovations The volume is split into three thematic parts Concepts and approaches New drivers of conflict insecurity and developmental challenges Actors institutions and processes For ease of use and organisational consistency each chapter provides readers with an overview of each research area a review of the state of the literature a summary of the major debates and promising directions for future research This Handbook will be of much interest to students of peace and conflict studies development studies security studies and International Relations *Pondering Alphabetic Solutions* Dr. Carolyn LaDelle Bennett, 2016-05-13 The author of *Breakdown Unconscionable* and *No Land an Island No People Apart* again tackles U S foreign and domestic affairs in context of global relations and the inescapable nexus of act and consequence This time Dr Carolyn LaDelle Bennett ponders Solutions in thought and act America one nation indivisible held together by citizen Duty Peace words without violence to V X Y Z Vive la Difference from Xenophobia and Zealotry Along with the books alphabetic textual design are centerfold images also centering the authors motive and protest of people displaced from four continents Europe Asia Africa and the Americas rendered homeless by tribal politics leaders foreign and domestic policies endless war and conflict For the student researcher or seeker of alternative perspectives the book contains full and detailed reference and index sections as well as appendices of pertinent biographical material and historic documents of the United States and the United Nations **Organizations and Industry 4.0** Vojko Potočan, Kornélia Lazányi, Zlatko Nedelko, 2024-08-01 Known models for assessing the readiness and level of Industry 4.0 implementation are helpful in revealing key technological and non technological aspects relevant in the frame of Industry 4.0 implementation in organizations At the forefront are technological aspects of Industry 4.0 implementation in organizations while non technological aspects play a marginal role Building upon ample evidence about the role of non technological aspects of Industry 4.0 implementation in organizations this book addresses these ever important non technological aspects The authors address the role of management solutions in the framework of Industry 4.0 implementation through the utilization of various management tools which support organizations working in all organizational areas The importance of humans for Industry 4.0 is currently severely neglected despite the many changes in the workplace Thus new challenges for

**Crime and Society** Donna Youngs, 2019-07-09 Much of a society's resources are devoted to dealing with or preparing for the possibility of crime. The dominance of concerns about crime also hint at the broader implications that offending has for many different facets of society. They suggest that rather than being an outlawed subset of social activity, crime is an integrated aspect of societal processes. This book reviews some of the direct and indirect social impacts of criminality, proposing that this is worthwhile not just in terms of understanding crime but also because of how it elucidates more general social considerations. A range of studies that examine the interactions between crime and society are brought together, drawing on a wide range of countries and cultures including India, Israel, Nigeria, Turkey, and the USA as well as the UK and Ireland. They include contributions from many different social science disciplines which taken together demonstrate that the implicit and direct impact of crime is very widespread indeed. The chapters in this book were originally published as a special issue of *Contemporary Social Science*.

**Latin America and the Caribbean in the Global Context** Betty Horwitz, Bruce M. Bagley, 2016-01-29 Current perspectives on Latin America's role in the world tend to focus on one question: Why is Latin America always falling behind? Analysts and scholars offer answers grounded in history, economic underdevelopment, or democratic consolidation. Bagley and Horwitz, however, shift the central question to ask why and to what extent does Latin America matter in world politics both now and in the future. This text takes a holistic approach to analyze Latin America's role in the international system. It invokes a combination of global, regional, and sub-regional levels to assess Latin America's insertion into a globalized world in historical, contemporary, and forward-looking perspectives. Conventional international relations theory and paradigms introduced at the beginning offer a useful lens through which to view four key themes: political economy, security, transnational issues and threats, and democratic consolidation. The full picture presented by this book breaks down the evolving power relationships in the hemisphere and the ways in which conflict and cooperation play out through international organizations and relations.
