World Bank Report 1999:

Human Rights Watch World Report 1999 Human Rights Watch Staff,1998-10-12 **Project Performance Report 1999** , **Poverty Reduction and the World Bank** ,2000-01-01 Improvements in social indicators have been substantial over the past 25 years but they have not been the same for those at the top and bottom of the distribution In fact the social indicators for those at the bottom have worsened in some cases substantially This annual publication reports on World Bank activities in fiscal year 1999 and provides an overview of what the Bank is doing to help countries face the challenge of reducing poverty It also looks at the future of Bank assistance at the national global and community levels Action on these three fronts represents the beginnings of a new strategic direction to be formulated in an implementation note after discussion of the World Development Report 2000 2001 on poverty is complete This new strategic direction includes a major program of knowledge sharing dissemination training and informed debate centered around the World Development Report and the Poverty Reduction Strategy Sourcebook *The World Bank* Manorama Gotur,2000 **Transnational Politics of the Environment** Liliana B. Andonova,2003-11-21 A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In Transnational Politics of the Environment Liliana Andonova examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards Transnational Politics of the Environment challenges the current focus on intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics **Environmental Problems in an Urbanizing World** Jorge E. Hardoy,Diana Mitlin,David Satterthwaite,2013-11-05 New edition of Environmental Problems in Third World Cities Cities in Africa Asia and Latin America contain some of the world s most life and health threatening human environments Environment related diseases and injuries cause millions of preventable deaths each year In many squatter settlements

children are 40 to 50 times more likely to die before the age of five than they would be in Europe or North America and most such deaths are environment related Many cities also cause serious environmental degradation to their surroundings and increasingly contribute to global warming This updated and much expanded edition of the classic Environmental Problems in Third World Cities describes environmental problems and their effect on human health local ecosystems and global cycles It points to the political causes that underpin many of these problems including ineffective unaccountable governments and aid agencies reluctance to work with the urban poor It also highlights innovative solutions such as High quality low cost homes and neighbourhoods developed by urban poor groups working with local non governmental organizations Local Agenda 21s developed by municipal governments in partnership with community organizations In their analysis the authors show that cities can meet sustainable development goals There are practical affordable solutions to their environmental problems but most of these depend on more competent and accountable city governments and on more support for low income households and their organizations The book also outlines the changes needed international aid agencies to support this

PRAISE FOR THE FIRST EDITION It is rare to encounter a work as authoritative and accessible as this It is a mine of useful information from cities in every corner of the Third World which does not shy away from the immensity of the problems but says as much about the solutions to them as about the problems themselves Jonathon Porritt Well written and very accessible The Geographical Journal Of value to students teachers practitioners policy makers and aid agencies Third World Planning Review A valuable resource for understanding the underlying problems this book offers practical alternatives Cities International

Global Prescriptions Rosalind P. Petchesky, 2003-08 Global Prescriptions is a critical yet optimistic analysis of the role of transnational women's groups in setting the agendas for women's health in international and national settings The book reviews a decade of women's participation in UN conferences transnational networks national advocacy efforts and sexual and reproductive health provision assessing both their strengths and weaknesses It critiques the Cairo Beijing and Copenhagen conference documents and World Bank WHO and health sector reform policies It also offers case studies of national level reform and advocacy efforts and appraises the controversy concerning TRIPS trade and essential AIDS drugs The author takes into account the formidable political and ideological forces confronting global justice movements and also offers a sobering reassessment of transnational women's NGOs themselves and such problems as NGOization fragmentation and donor dependency Petchesky argues that the power of women's transnational coalitions is only as great as their organic connection with grassroots social movements

Social Policy for Development Anthony L. Hall, James Midgley, 2004-03-31 Strong social policy is essential for sustainable growth This book is an extremely useful overview of social policy issue for policy makers and anyone who wants to understand the true roots of successful sustainable development Ian Johnson Vice President for Sustainable Development The World Bank Throughout the world issues of social development have now taken centre stage There is no more comprehensive and readable guide to the choices and conflicts of

this global drama This book is essential reading for all students and practitioners of social development and for every World Bank economist David Piachaud Professor of Social Policy London School of Economics This much needed textbook fulfils a major gap in providing a complete up to date guide and introduction to the increasingly important role of social policy in the context of development processes and practice Across a number of key sectors and areas of social policy concern the authors accessibly introduce and explain the main conceptual debates the most recent policy discussions and provide applied examples to illustrate the latest developments in the social policy and planning field Central topics covered include poverty rural development urban development education health social work social welfare international development and cooperation Social Policy for Development is an essential text for all students and practitioners alike seeking a deeper understanding of the issues of poverty social exclusion and deprivation across social policy and development studies internationally

Educational Restructuring in the Context of Globalization and National Policy Holger Daun,2002 This study posits that global change is being driven mainly by financial forces new patterns of economic growth and market ideology It then goes on to examine the forces opposing such globalizing processes such as religious and ethnic social movements throughout Africa Asia and Latin America **Geopolitics and the Post-Colonial** David Slater,2008-04-15 With a critical focus on US Latin American encounters the book analyses geopolitical issues from a post colonial perspective A novel approach to understanding US Third World relations Critically considers the genesis of US power Interweaves ideas and events interventions and representations Highlights the contribution of Third World intellectuals *Development Theory and Practice* Uma Kothari,Martin Minogue,2001-10-30 This text provides a critical assessment of dominant features of development theory and practice in such areas as globalisation governance social development participation feminism and postcolonialism civil society environment and development management Each chapter addresses a particular approach within development by setting out the orthodoxy and critically evaluates this before engaging more constructively with the challenges presented by contemporary development This approach will give students a clearer understanding of the debates within development today **Sustainable Banking** Jan Jaap Bouma,Marcel Jeucken,Leon Klinkers,2017-09-08 This comprehensive addition to the debate on sustainable development has been produced in order to take a global pulse on how the financial services sector is responding to the growing challenge of shareholder and stakeholder expectations on social and environmental performance In the opinion of many commentators in this new book given the intermediary role banks play within economies their potential contribution toward sustainable development is enormous Indeed for banks the conclusion that corporate sustainability has become an investable concept that increases long term shareholder value is becoming difficult to deny To date banks have been relatively slow to examine their exposure to risk the environmental and social performance of their clients and the business opportunities of sustainable development the products and services they offer Not before time Sustainable Banking concludes that this is beginning to change with both risk and opportunity

becoming established elements in banking policies towards environmental sustainability In addition banks have now begun to take notice of and address their own environmental performance Through the use of case studies and detailed analysis the book examines the environmental policies of banks the importance of transparency and communication with their stakeholders environmental and ethical investment funds current practice by the providers of financial services with regard to environmental risk management and finally the key role of government NGOs and multilateral banks in delivering sustainability Sustainable banking has not however been achieved and nor will it be in the immediate future As globalisation proceeds apace Sustainable Banking argues that improvements are necessary in banks attitudes toward transparency and accountability with regard to their lending policies In addition in order to promote best practice the leading banks need to start measuring their customers environmental performance in order to persuade polluting clients that minimum compliance to regulations will no longer suffice The book finds many shining examples in the co operative mutual and social sectors for the big players to emulate Environmental and ethical considerations in such loan portfolios have proven to be profitable and best in class larger banks are now also reaping benefits The unprecedented scope of the book has attracted contributors from four continents including Deloitte Touche Rabobank The World Bank The European Bank for Reconstruction and Development The United Nations Environment Programme The World Business Council for Sustainable Development UBS Henderson Investors KPMG The World Resources Institute and SAM Sustainability Making Progress C. Leigh Anderson, Janet W. Looney, 2002-01-01 While a universal definition of progress has proved elusive measures of progress have been defined and grouped into the broad areas of material wealth social relations technical capacity and moral aesthetic and intellectual sensibilities However not until the Progress Project whose results are gathered here has the impact of progress on public policy in these realms been systematically explored In this volume noted scholars in economics government education technology literature culture and religion among other fields discuss the meaning and measurement of progress in their areas of specialty They assess particular policies that have either promoted or retarded progress and provide recommendations for policy processes or instruments that better reflect the nature of forward movement in the current era Making Progress is an important contribution to both the theoretical and practical literature on public policy it is a resource for scholars and students as well as a guide for policymakers analysts and advocates who help craft those policies in the name of progress **The United Nations and Education** David Coleman, Phillip W. Jones, 2004-11-10 The UN is often questioned about its ongoing relevance and overall effectiveness in the 21st century particularly in its involvement with educational policy and co operation around the globe This ground breaking book examines the four key agencies within the UN system that share the vital role of addressing educational futures UNESCO the World Bank UNICEF and UNDP As the core of educational multilateralism these agencies powerfully reflect the UN s historic grounding in peace human rights and economic development The history of each agency s commitment to education is explored with critical detachment with

particular attention paid to the post Cold War period during which each agency has needed to re think the impact of globalisation on both its modes of operation as well as the content of its education policies Just as education policy itself has been subject to the impact of globalisation so to has each agency had to adapt at a time when not only education but also their own mandates have been thrown open to question This timely book will be essential reading for all those working with and for UN agencies foreign aid workers and the development co operation industry At a time when education policies budgets and strategies appear wide open to profound changes this book will provide a much needed roadmap to the future

Latin America Transformed Robert N Gwynne, Kay Cristobal, 2014-04-23 Praise for the first edition Accomplishes its task to provide readers with a broad multi disciplinary view on globalization s many impacts on Latin America the organization of the collection is logical and thoughtful and the structural perspectives offered are convincing and powerful I recommend it to other Latin American social scientists Growth and Change An impressive timely and lively volume which is especially valuable for teaching purposes Journal of Latin American Studies Authoritatively written by leading scholars in their respective fields Area Latin America Transformed 2nd Edition explains the region s economic political social and cultural transformations its association with globalization and the search for modernity and contributes to a greater understanding of how these transformations are affecting the people of Latin America Using a political economy approach to unravel the concepts of globalization and modernity within Latin America emphasis is placed on interpreting the macro level structures that frame the transformations taking place The book also investigates the dynamics of people s livelihoods as they make sense of rework and live out these structural transformations The international team of authors involved with the successful first edition have updated their focus and substantially rewritten their material to examine the challenges facing Latin America in the twenty first century Three completely new chapters have also been added Latin America Transformed 2nd Edition is now even more useful for undergraduate and postgraduate courses that examine economic political social and cultural change in Latin America

The Illusion of Progress Alexander Gillespie, 2014-10-14 Is sustainable development a charade sold to an increasingly misled public This book presents a wide ranging penetrating critique of sustainability and what it actually means The author argues that despite the rhetoric of socially and environmentally sustainable development and the ever increasing number of legislative environmental policies the real issues such as consumption population growth and equity are either sidestepped or manipulated in international policy and law Analyzing the main areas of concern economic growth market structure trade aid debt security and sovereignty he shows that the entire development structure and the underpinnings of the debate are leading down quite a different path to that intended by sustainability **Arab**

Development Challenges of the New Millennium Belkacem Laabas, 2017-11-22 This title was first published in 2002 In 2000 a major international conference was organized by the Arab Planning Institute to identify analyze and compare development challenges facing Arab countries at the dawn of the new millennium An interdisciplinary team of scholars were

brought together from the fields of regional science development studies economics business and government policy and together they addressed global regional and domestic challenges and their impact on the Arab region This volume brings together the best papers presented at this conference In doing so it offers up to date insights into and a clearer understanding of this region It highlights issues including economic and social implications of globalization strategic alliances the implications for Arab countries of emerging technological patterns the impact of the European Monetary Union and the euro Arab regional integration education and the development of individual Arab country s economies *China's Economic Development, 1950-2014* Chu-yuan Cheng, 2014-09-26 China s Economic Development 1950 2014 Fundamental Changes and Long Term Prospects is a comprehensive and up to date analysis of Chinese economic development from 1950 2014 focusing on current world wide attention to the economic reform Chu yuan Cheng covers a wide range of topics including the cultural effects and ideological influences on China s economic development the process of China s transition from a planned to a market economy leadership changes and the root of the Cultural Revolution the machine building industry and scientific and engineering manpower in China China s new development plans in the twenty first century and the process and consequence of the Quiet Revolution the international economic relations including the U S China Sino Japanese economic relations and access to WTO economic relations across the Taiwan Strait and the formation of the Greater China Economic Sphere and the long term development prospect of the Chinese economy in the twenty first century and beyond **World Bank Literature** Amitava Kumar, 2003 World Bank literature is more than a concept it is a provocation a call to arms It is intended to prompt questions about each word to probe globalization political economy and the role of literary and cultural studies As asserted in this major work it signals a radical rewriting of academic debates a rigorous analysis of the World Bank and the International Monetary Fund IMF and a consideration of literature that deals with new global realities Made more relevant than ever by momentous antiglobalization demonstrations in Seattle and Genoa World Bank Literature brings together essays by a distinguished group of economists cultural and literary critics social scientists and public policy analysts to ask how to understand the influence of the World Bank IMF on global economic power relations and cultural production The authors attack this question in myriad ways examining World Bank IMF documents as literature their impact on developing nations the relationship between literature and globalization the connection between the academy and the global economy and the emergence of coalitions confronting the new power World Bank Literature shows above all the multifarious and sometimes nefarious ways that abstract academic debates play themselves out concretely in social policy and cultural mores that reinforce traditional power structures SGRP Annual Report 1999 of the CGIAR System-wide Genetic Resources Programme ,
