GEOGRAPHY

How does geography affect how a civilization develops?

The people who study history are also the people who write about history. They piece together the information they find in order to understand people from the past. Their field of study is called **historiography**.

Social scientists also use geography to study history. The book *Guns, Germs, and Steel* looks at how geography helped and hurt civilizations in the past. Jared Diamond, the book's author, explained the three factors that helped Eurasian civilizations succeed: good temperatures and locations for agriculture, resistance to certain deadly germs, and the ability to develop technology.

Where a group of people settle can affect how, when, and in what way they

develop. The island nation of Japan was very isolated from the West before the mid-1800s. By the early 1900s, Japanese people were trading with the West and the country was considered a world power. Great Britain, also an island nation, developed much earlier. Britain was part of the Roman Empire. It later joined other European countries to start colonies around the world. The British had to develop a strong navy in order to protect its own empire around the globe.

1. Why did Japan develop later than Great Britain?
