The Gulf Military Balance Anthony H. Cordesman,Bryan Gold,2014-03-12 The United States faces major challenges in dealing with Iran the threat of terrorism and the tide of political instability in the Arabian Peninsula The presence of some of the world s largest reserves of oil and natural gas vital shipping lanes and Shia populations throughout the region have made the peninsula the focal point of US and Iranian strategic competition Moreover large youth populations high unemployment rates and political systems with highly centralized power bases have posed other economic political and security challenges that the Gulf states must address and that the United States must take into consideration when forming strategy and policy

Iran's Deadly Ambition Ilan Berman,2016-12-06 Are we on the cusp of détente with Iran Conventional wisdom certainly seems to believe so Since the start of diplomacy between the Islamic Republic and the P5 1 powers the United States France England Russia China Germany in November 2013 hopes have been running high for a historic reconciliation of Iran s clerical regime with the West Yet there is ample reason for skepticism that the United States and its allies can truly curb Iran s nuclear ambitions by diplomatic means Moreover the West s current focus on Iran s nuclear program is deeply dangerous insofar as it fails to recognize let alone address Iran s other international activities or its foreign policy aims Those objectives are global and they continue to grow in scope and menace In this sobering book Ilan Berman illuminates the multiple dimensions of the Iranian threat and exposes the perils of lodging confidence in diplomacy with the Islamic Republic

Wirtz,2022-05-12 The 2007 Iran Nuclear Estimate Revisited Anatomy of a Controversy explores both the contents and reaction to the U S intelligence community s IC National Intelligence Estimate NIE that Iran had suspended its clandestine program to develop nuclear weapons The volume offers insights into the art of intelligence analysis and the issues encountered when estimates run counter to policy or partisan preferences In November 2007 the U S National Intelligence Council issued an NIE entitled Iran s Nuclear Intentions and Capabilities that contained a surprising finding Analysts concluded that Iran had probably suspended its clandestine effort to develop a nuclear weapon This assessment created a political firestorm despite the fact that analysts went to great lengths to assess the accuracy of their sources and to offer nuanced judgments about the complex issues surrounding Iran s civilian and military nuclear programs In this edited volume former intelligence professionals and leading intelligence scholars describe and assess the factors that shaped this NIE and the course of events that sparked an international controversy These chapters make a valuable contribution to the understanding of the state of the art when it comes to intelligence analysis and the challenges that emerge when intelligence estimates address significant foreign and defence policy issues and on going political debates One of the chapters in this volume was originally published in the book titled Routledge Companion to

The COVID-19 Intelligence Failure Erik J. Dahl, 2023-02-01 An in depth analysis of why COVID 19 warnings failed and how to avert the next disaster Epidemiologists and national security agencies warned for years about the potential for a deadly pandemic but in the end global surveillance and warning systems were not enough to avert the COVID 19 disaster In *The COVID 19 Intelligence Failure* Erik J Dahl demonstrates that understanding how intelligence warnings work and how they fail shows why the years of predictions were not enough In the first in depth analysis of the topic Dahl

examines the roles that both traditional intelligence services and medical intelligence and surveillance systems play in providing advance warning against public health threats and how these systems must be improved for the future For intelligence to effectively mitigate threats specific tactical level warnings must be collected and shared in real time with receptive decision makers who will take appropriate action Dahl shows how a combination of late and insufficient warnings about COVID 19 the Trump administration s political aversion to scientific advice and decentralized public health systems all exacerbated the pandemic in the United States Dahl s analysis draws parallels to other warning failures that preceded major catastrophes from Pearl Harbor to 9 11 placing current events in context The COVID 19 Intelligence Failure is a wake up call for the United States and the international community to improve their national security medical and public health intelligence systems and capabilities
