Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In Slow Burn R Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally

The Good Death Ann Neumann,2017-02-07 Following the death of her father journalist and hospice volunteer Ann Neumann sets out to examine what it means to die well in the United States When Ann Neumann s father was diagnosed with non Hodgkin s lymphoma she left her job and moved back to her hometown of Lancaster Pennsylvania She became his full time caregiver cooking cleaning and administering medications When her father died she was undone by the experience by grief and the visceral quality of dying Neumann struggled to put her life back in order and found herself haunted by a question Was her father s death a good death The way we talk about dying and the way we actually die are two very different things she discovered and many of us are shielded from what death actually looks like To gain a better understanding Neumann became a hospice volunteer and set out to discover what a good death is today She attended conferences academic lectures and grief sessions in church basements She went to Montana to talk with the attorney who successfully argued for the legalization of aid in dying and to Scranton Pennsylvania to listen to pro life groups who believe the removal of feeding tubes from some patients is tantamount to murder Above all she listened to the stories of those who were close to death What Neumann found is that death in contemporary America is much more complicated than we think Medical technologies and increased life expectancies have changed the very definition of medical death And although death is our common fate it is also a divisive issue that we all experience differently What constitutes a good death is unique to each of us depending on our age race economic status culture and beliefs What s more differing concepts of choice autonomy and consent make death a contested landscape governed by social medical legal and religious systems In these pages Neumann brings us intimate portraits of the nurses patients bishops bioethicists and activists who are shaping the way we die The Good Death presents a fearless examination of how we approach death and how those of us close to dying loved ones live in death s wake

Summer versus School James Pedersen,2015-01-22 As American educational reformers continue to find innovative ways to address the global achievement gap many experts seem to agree that increasing instructional time is a viable option In addition to extending the school day some educational leaders have looked to modifying the traditional academic calendar to address some of the academic losses that occur when students have 8 10 weeks of summer vacation each year Re examining how students spend their summer vacation although considered by many to be a cultural taboo may be the answer to addressing global competition and decreasing the national achievement gap The need for a two month break from schools harkens back to a pre industrial time that no longer is pertinent for our students Although an answer may be staring us in the face are we willing to give up on the American tradition of summer vacation all in the name of reform and student success
