Movement The tiny house movement is gaining momentum and popularity for its cost effectiveness and simplicity People who
support this movement are happy to live in a downsized home their tiny house is a lifestyle that they adopt adapt and are
happy in doing so While one might argue the disadvantages of living in a tiny space the financial freedom that it brings along
cannot be disregarded The average size of a house in the United States of America was 1 500 square feet in the 1950 s now
when the family sizes are shrinking the average house size is 2 400 square feet The lavish spaces in a 2 400 square feet
house lies dormant for most part of the year One such classic example is the living room which serves its purpose for a couple
of hours during the Christmas season rest of the time its existence is hardly noticed or acknowledged ditto for the multiple
bathrooms the huge dining room bedrooms and garage parking The cost one pays for a huge home that is hardly used is
hefty a mortgage that stretches almost until the end of one's retirement Add to this the maintenance cost and the carbon
footprint of a huge house
